

Dear White House,

The decolonize, or “remove colony,” movement is very dangerous to the American people, particularly Native and long-established communities. I am asking that all nonprofits, as well as organizations using inflammatory racial language to hurt the American people, be investigated and prosecuted where necessary.

I am afraid of these movements and what they are capable of. With the understanding that the left is actively attacking our borders and national defense, and blaming the American people for acts that they themselves have committed, including support of human traffickers, cartels, drug wars, exploitation and negligence so severe that it amounts to forms of war, such as modern ghettoization and economic collapse, I am asking that these forms of racial discrimination and violence be called and addressed as what they are, forms of modern warfare against the American people.

Please 🙏 let's stop the momentum of the left targeting the American people.

Let's “Recolonize,” in other words, end the forced diaspora, occupation, and foreign aggression against the people of this great nation we call home. Let's heal our nation and set important boundaries by telling these modern warfarists where to go. Let's send them packing and make sure they know they are never welcome to terrorize our people again. Let's permanently end the “Hurt and Replace Americans” movement they refer to as “decolonize.”

Save America. 🇺🇸💙
