

Anti-State K, Hispanic Federation and Supporters

These organizations are using taxpayer funds to build coalitions that actively target and attack our public servants, native White Americans, and argue against our safety and protective measures, while seeking no accountability for crimes and damages caused to American businesses, including looting, organized theft rings, and even civil war fronts that break into businesses to rob them in the name of “protest.”

Americans have never been so alarmed by this amount of foreign criminal power in the US, and these organizations aim for more. They are out of their minds and, assuredly not on our side. Americans deserve better than tax exploitation by foreigners and a severe lack of accountability for the crimes they commit. Enough is enough.

These are inherently racist organizations that discriminate against Americans and will never hold accountable the criminals they so adamantly advocate for. It is all one big exploitation, theft and fraud ring that seeks to dismantle “White supremacy,” target Whites, and take power away from Americans. We have seen enough. Please, let’s end tax payouts to racist and discriminatory foreign organizations and give the power back to Americans where it belongs.

Please support CORCA and please end tax payouts to:

•ACLU •Hispanic Federation •The Leadership Conference

Save the American vote. We also support the \$50,000 fine per non-citizen as has been addressed in previous lawsuits.

Other organizations of interest who are posing a real threat to national security, American voices, and important voter safeguards:

•Dēmos •LatinoJustice PRLDEF •Arnold & Porter •Poder Latinx

After five years of extensive research, whether examining asymmetric or organized criminal activities, we have come to view these experiences as part of a Cold War front and a threat to American democracy and our way of life.

Americans require safety and security assurances. These organizations actively and vehemently argue against those assurances. Instead, they advocate for a society with less law and order that is more accommodating to smugglers, traffickers, violence and organized

criminal activity. We feel they are promoting Hispanic territoriality, power and supremacy. Despite operating within the United States, we believe the interests, safety, and well-being of American citizens are deserted. US calls on American citizens to reclaim safety and security, wherever these uphill battles may arise. We must not let the war on US win.
