

Hurt and Devastated By New Pesticide Exposure - Arizona

I am devastated. I had just worked so hard to get these pesticides out of my life, to heal and to recover my health. I worked so hard to get my home beautiful and comfortable. Restored all of my clothing, shoes, and everything. And what did they do? They dropped another pesticide bomb on me.

I am in so much pain as I write this, and now, again, trying to figure out how I will recover. I am afraid of permanent damage to my reproductive system. Fipronil is so toxic and scary, and it has caused me scarring. This is how fast it works, it can completely kill your health in just a few days. This is a worst nightmare.

Please open your eyes to this war. It is not normal to not be able to say no or to never be asked for consent on issues that can wreak havoc on your health, life, and wellbeing. 🙏 They need to be banned. Human health must be our first priority, never ever our last. [hashtag#PesticideExposure](#) [hashtag#PesticideAwareness](#) [hashtag#PesticideFree](#) [hashtag#ChemicalExposure](#)
