

OSIRAMS Political Warfare

The American homefront is increasingly vulnerable to coordinated foreign OSIRAMS activity operating through political warfare and “secret,” conflict. These operations rely on disruption, destabilization, and internal strain as well as direct attacks.

Sabotage to Assume Control, SAC

Also understood as Target Sabotage, Assume Control. This strategy works by intentionally undermining stability, safety, and trust in order to create conditions where control can be imposed or justified.

For Profit or For Power

These efforts may involve transnational criminal alliances, including Russian and Israeli organized crime elements, joined by additional global networks such as mafia groups, mob operations, cartels, smuggling rings, and other organized crime structures operating across borders.

They target Americans in order to assume control: they operate domestic and internationally. They are currently holding power in many dimensions of society.
