

Moka Coffee Shop Vandalism Update

Union of Saints

Ushanka-Style Hat

The individual appears to be wearing an **ushanka-style hat**, a Russian/Soviet-associated winter hat, along with a mask. The small mark on the front of the hat may be a military insignia, although the image quality does not allow the insignia to be identified with certainty.

For reference, traditional Soviet military ushankas commonly had a **red five-pointed star**, sometimes featuring a hammer and sickle and a wreath.

Concerns Regarding Political Activism and Psychological Warfare

There are concerns that Russian or communist activists could attempt to fuel racial conflict or incite violence, including against White Americans. Psychological warfare can be designed to **prey on the heart, compassion, and vulnerability** of a population.

The question is: **Why would they benefit?**

Many political and activist organizations operate through fundraising, advocacy, media attention, and public campaigns. Organizations built around racial issues can have financial and political incentives to maintain public attention around racial conflict.

What do businesses do? They create a demand. A hoax or staged incident can fuel controversy, increase racial conflict, garner support, and ultimately contribute to further harm and division within the American population. Essentially, the creation of racism makes a profit.

Organizations and Historical Claims

ACLU: There have been historical controversies involving the ACLU and its defense of the rights of organizations, including cases involving the Ku Klux Klan.

SPLC: The Southern Poverty Law Center has also faced controversies and legal disputes concerning its treatment of organizations and individuals it has designated as extremist.

ADL: Under scrutiny for targeting and surveillance of White Americans and Catholics.

BLM: Black Lives Matter and related organizations have faced controversies involving allegations of misinformation, disputed incidents, and the use of racialized narratives. History of targeting White businesses with over two billion in insured damages.

These matters should be investigated not just through the local police, but also the FBI as it concerns fourth generational conflict.

Key Evidence to Examine

The most useful evidence from the Moka Coffee Shop vandalism photographs would include:

1. The **hat and its insignia**.
2. The individual's clothing and any identifying markings.
3. The mask and other items that may help establish whether the same individual appears in other surveillance footage.
4. The sequence and timing of the photographs.
5. Additional surveillance footage from surrounding businesses or locations.
6. Any physical evidence left at the scene.
7. Whether the incident was independently verified as vandalism and whether investigators have identified a suspect.

At this stage, the **ushanka-style hat and possible insignia are observations from the photograph, may offer insight to possibly Russian, communist, or left activist link**. Further evidence would be necessary to establish the person's identity, affiliation, nationality, or motive.
