

Left Jewish Propaganda, Very Anti-White, Post WW2

Left German/Russian Jewish Propaganda is often “Anti White,” which often stems from a World War II mindset and is nothing new. It may also aid foreign wars, such as the war in Russia. Any form of mass migration and invasion into any culture may alter the race, demographics, and culture, and is itself a form of colonialism as well as warfare. It is called “settler violence” in Israel; there is no difference in America.

Local American cultures have been mostly left alone for generations and centuries of historical development. They are now facing forced, mass, instrumental immigration by foreigners, and the issue resembles any genocide. When combined with violence as we are experiencing and racial targeting of White Americans it certainly exceeds meeting the criteria. It is a crime against humanity to force newcomers, cultures, and populations onto historical societies.

Acadian Americans are a population who experienced this in Canada: mass waves of new colonials, gradual immigration, demographic alteration, and then, ultimately, they were targeted, genocided, experienced mass diaspora, and forced foreign cultural assimilation. They were denied their own language, heritage, and history, and today are one of the smallest minorities in America. This same experience is occurring today. White flight and diaspora are realities many Americans have faced throughout history, and these severe demographic alterations can be seen very well in historical photos. This experience was perpetuated also by many Black and Jewish activists in America. The experience was not isolated only to some communities and *far from it*.

Rosa is showing us an example of modern wartime propaganda. Americans have a right to protect themselves from any form of population changes, but especially **MASS INSTRUMENTAL DEMOGRAPHIC AND POPULATION CHANGES** by the millions that actively replace the culture and native demographics as well as are actively targeting the locals. Rosa may be an immigrant to the United States and does not have a native heritage; she may not be protective of the American culture because of this. Today, anthropological White Americans make up just 20% of the American population, and this experience can be felt and experienced everywhere as White Americans experience mass racial targeting perpetrated by newcomers.

This is the gravity of our experience.

No, There Isn't a White Genocide

BY

ROSA SCHWARTZBURG

From Tucker Carlson to fascist terrorists, the far right claim that mass migration is an “invasion” designed to destroy and replace the “white race.” But the theories behind this meme are more than a century old — and they’ve always been about repressing the victims of slavery and colonialism.
