

A Nightmare, Pesticides, 4GW

10:30 p.m. 8.6.26 Trying to move as fast as I can, in awful pain! This stuff creeps into the reproductive system, aches in bones, same symptoms, forehead pain, leaks into skin. They sprayed outside, and yet these are my extreme symptoms inside. It shouldn't be legal, yet they are spraying without consent or warning. At my last location, I was forced to discard all of my brand-new belongings. Here, I repaired, and yet, here we are again. I have been completely contaminated. This is an absolute nightmare. This is not a normal experience!
