Hi Ho A Derry~ End The Factory Farming Industry ~Oh Support The Small Farm

Le fermier dans son pré

1.5 million pounds of meat represents approximately 2,000 to 7,500 animals, depending on the type of meat and animal.

Animal	***Approx. usable meat per animal***	***Animals for 1.5 million lbs***
Cattle (beef)	*500 lbs*	*3,000*
Pigs (pork)	*150 lbs*	*10,000*
Chickens	*4 lbs*	*375,000*
Turkeys	*15 lbs*	*100,000*
Sheep (lamb)	*35 lbs*	*42,858*

These estimates assume typical edible meat yields, which vary by animal size, processing, and cuts.

For beef specifically, 1.5 million pounds of meat would represent about 3,000 cattle.

Are you asking about beef, pork, chicken, or a mixture of meats?
