

## Case Summary

# Political Cults Are Destroying Americans & Committing Crimes Against Humanity

Anti-ICE and “No Kings” protests are led and strongly influenced by Jewish campaigners, Bend the Arc and affiliated political advocacy networks, which support mass migration, white suppression and eugenics campaigns as a political strategy. In my assessment, their approach functions as a form of cultural replacement and aligns with destabilization tactics historically used in Cold War-style campaigns, including those associated with Chinese, cartel-linked Mexican, and Russian influence operations.

Based on my case studies, these patterns were consistent and repeated throughout my casework. I find this deeply disturbing, particularly where political advocacy on American soil prioritizes ideological objectives over national sovereignty, public safety, and the well-being of American citizens. My concern is terrorism and genocide through organized activism, and the consequences that follow when such movements exert disproportionate influence on U.S. policy and civil order.

I conclude my case studies by stating that these patterns were resounding throughout my casework and that I am deeply disturbed by ideological political activity operating on American soil where Americans themselves are not only terrorized, but are being systematically replaced.

I believe Jewish politicians are largely responsible and are committing Crimes Against Humanity against the American people. At this stage, I would consider their campaigns terrorism.
