

Symptoms from Pesticide Spray at Maine Motel

9.24.26 – 9:11 PM

Waking up and experiencing pain on my forehead.

Unfortunately, even in Maine, I have discovered pesticide use.

The motel owner may have sprayed the upstairs or somewhere on the facility.

I noticed the truck on the property.

On one of my drives, I also noticed an advertisement for pesticides.

I also read that the cartel had overused pesticides on marijuana products, over 750%X above legal limit. This is a product that kills when inhaled.

I am very worried about pesticide use on Americans at this time. It is clear that there is a communication breakdown in general, and energy suppression, however, particularly regarding human health standards and pesticide use, and that pesticides are being overused.

I cannot believe that even in Maine, I am now witness to yet another pesticide exposure.

Thankfully, I only have one more day; however, I am considering leaving tomorrow.

I also am hearing Asian foreigners, particularly at night.

People should be warned of the dangers of pesticide use and how they may affect human health.

First thing in the morning, I will be moving my belongings out. Thankfully, I had already kept my clothes in bags due to the last exposure.

Is all of this making sense? It seems no matter where I have been in the United States, pesticides are being overused.

This has only been since the pandemic and over the course of the last several years.

It isn't normal to be this exposed to pesticides and to have to live in pain from so many exposures!

In all of my life I had never been exposed! Now all of the sudden, I cannot seem to find refuge *anywhere*.
