

From Debate to Violent Civil War: The Weaponization of Crime as Hybrid Warfare

Union of Saints

We have gone from women clutching their purses to protect themselves from thieves and petty theft to mass looting, arson, property destruction, and a devastating human cost carried out in the name of protest and modern warfare. Instead of standing with Americans during this time, especially American victims, the left has chosen the opposite extreme. They are supporting these criminals.

This is how far off the scale we have gone. This is no longer simply a matter of debate. It has become a matter of **human safety, humanity, and violent civil conflict**. The same reality may be seen in other forms of crime.

Conclusion: This is no longer a debate. *It has become a war over public safety and the protection of innocent Americans.*
