White Taxpayers Forced To Pay For Their Own Oppression, Exclusion From Society, Modern Slavery

How much might White taxpayers have contributed?

A defensible estimate would require the total verified DEI spending and a defined measure of White taxpayers' share of the taxes funding it. For illustration only, if a verified program cost were $1 billion and White taxpayers funded 60% of that amount, their estimated contribution would be $600 million. The 60% figure is hypothetical, not an established estimate of their actual tax share.
