

Attempt To Revise The Medicare/Medicaid Policies
with intent to eliminate the Unconstitutional Policies and
Mechanisms for Facilitating Deprivations of Rights Under Color of Law

My Authority to DEMAND these revisions is derived from
The Federal_(10th Amendment) and Wisconsin Constitutions (Continuity of Civil Government and definitions of the Militia)
and can be defined as my Conscription to the Government Office of: **Dictator of Medicare/Medicaid Policies etc**

Page 27.) Inpatient hospital care

“Inpatient care for a qualifying clinical research study”

- **Dictator's Mandate: Carefully watch this one as it is not something I can Constitutionally dictate to be removed in such limited description. “Audit required”**

Probably only legitimate if the Patient Voluntarily Enrolled in the Study FREE FROM COERCION
ex of coercion currently used: Denial of better alternatives (ex violation of 4th, 18th, 21st) and/or false
diagnosis used to excuse torture/maiming/murder via involuntary treatment for which “volunteering for
a study of alternatives is less guaranteed to maim/kill or not as quickly/painfully” ex. Relevant to the
Current situations: Psychosis and skitzopherena are never real disease states as no physical cause is tied
to the diagnosis and is too broadly defined to be symptoms. Therefore I was attempted to be coerced
into volunteering for implantation of a neuronal chip such as Elon Musk's (Confession of order to do and/or personal
rational that stands up to reasonable scrutiny and b/c I suspect is the not forgivable caving to violent coercion: penance for sins/compliance with treason
required if you want the respect I used to have for you). Schizophrenia intended neuronal implant. I refused to develop, document for
reproducible patent requirements, and therefore grant “Security Clearance” for things related to that field and for reasons that need no explanation. They
did attempt to torture the manufacturing methods of materials out of me in the psych ward via the violations of due process/the laws and refusal to accept
credentials (manipulation method to get slave-labor style work through “proving yourself.”

Page 28.) Skilled Nursing Facility Care

- **Dictator's Mandate: Never to include Psychiatric Ward as a skilled nursing facility.** (They have zero skills whatsoever and simply drug their human sacrifices at the threat of a firearm to keep us from successfully rebelling and freeing ourselves)
- **Make require Consent of the Patient: and set maximum coverage to minimum wage currently \$360/day which \$15/hr or minimum wage for 24hrs for one dedicated Nurse:** which is excessive b/c in the valid to cover version (helping with activities of daily living) pretty much any young/fit person can manage. This is honestly the type of thing that is expected of children and grandparents in loving families if in the form that is sold as. The only difficult part being the results of laziness/neglect like the lugging out of the rooms of dead bodies (I have known people who work in the elderly care versions: they called it “death care”) Did you know that they won't even give their inmates morphine/effective opioids until the facility has determined that it is “their time” and then the dose is for the purpose of “easing the passing” not for effective/appropriate treatment of pain: they use overdoses of morphine to cull the nursing home residents before becoming unprofitable by using too much of their victims sum total life's work signed (often involuntarily) over to the institutions.

The only real skill is communication and moral factors of the patient. The ethics of the Nurse matter. Remember that the elderly get Social Security Retirement Insurance usually at the maximum rate (b/c unlike me they were not kidnapped and subjected to deprivations of rights under color of law preventing them from being allowed to work (literally when the DHHS found me last time in West Allis they first found my job and scared my boss into firing me, waited for me pick up my last check and followed me back to my residence and attempted to illegally arrest me, but I ran inside. They reportedly assaulted a neighbor trying to gain illegal access. I was very much so ready to launch at least one fire-extinguisher style torpedo, a couple of single shot improvised projectiles-type loaded with 50 caliber round from WWII)and their Medicare premiums deducted are based upon the expenses and revenue of the program. (If you never got tips from the elderly when working for them: you were not working for them but against their interests.) This is the 3-day hold Ch.51 Involuntary commitment for “treatment's” primary financial incentive

Page 30: Advance care planning:

- **Default Advance Directive that is furnished and has the following prohibitions:**
 - **No Involuntarily Administered Antipsychotic-Class Drugs**
 - **No Involuntarily Administered Drugs or Treatments for “Mental Health” (obviously includes other false-science terms like “behavioral health”)**
 - **No Involuntary Surgeries or Diagnostic Procedures unless Immediately Threatening and I am Unconscious.**
 - **No Electroshock or ECT**
- **As the Primary Agent You have your State Constitution**
- **As the Secondary Agent You have The Federal Constitution**
- **As Witness attesting to your “Rights to be Alive and Healthy”**
 - **The Universal Declaration of Human Rights (United Nations)**
 - **The Constitutionally Adherent Declarations of your chosen ethical/moral authorities (ex. The Bible, Torah, Koran/Quran, Vedas** (have only read in part but is known that some sects that call themselves Hindu are actually Baal/Moloch worshippers while others claim to be earlier followers of Christ/Krishna so in truth Hinduism is not a valid definition as used to group both valid and invalid religions together by a definition that is more or less racially defined) , etc that I have not read/unable to cite for reason of ignorance (Provides mechanisms for Conscripted/Drafting into Militia-Service the valid “Conscientious Objectors”=save our souls)

Page 31.) Ambulance services

- **Dictator's Mandate: Do not cover for anything that is not justifiable. This should have been obvious but if an ambulance is needed, there is a physical medical emergency that could require treatment** (not chemical lobotomy as form of restraint used in process of slave-catching= Haldol and other injections they give those who even verbally

object to being kidnapped)

Train Paramedics to have the courage to recognize and refuse an illegal(s) order from the Police etc.

****Page 31: Ambulatory Surgical Centers*: seriously audit audit audit, is the retailation method or “Alternatives” they keep secret to make claim of unable to understand the “advantages and disadvantages of Drugs” B/C They add penalties Most Treasonous***

- **Dictator's Mandate: Might Ban Altogether or make defined as: “Is only covered for Patient Elected Surgeries and Procedures”** that are requiring the ridiculous amount of paperwork to approve such that this is not corrupted into meaning mobile units that perform for example sub-orbital lobotomies and other known Treason(s) that have happened.

Treasonous procedures are not even considered an option: Publish list of covered procedures in a readable format that is not prone to being a vector for computer viruses such as the Zip file I cannot read on the device available at this time. It is obvious that the CMS is hiding a lot of shit here b/c PDF would be fine for a several hundred page book of 10,000+ codes linked to procedure descriptions.

Surgery of any kind is not to be taken lightly and if I need a surgery I will consent to it and it won't be done in an implied by name: ambulatory: to be a mobile surgical center that means it is performing surgeries in bulk and is sooo horrific that I have seen the hole under people's eyeballs that makes this issue even worse.

The published examples on Google searches are already covered in the category of “Acute Care Services” and need not be lumped in with something that is named “on the move.” Medicare is not the Active duty in a war zone military Medical Corps: like the only situation with mobile surgeries needed that happens often enough to need it's own section.

Don't let this one go through it is not referring to standard surgical procedures that have medical reasons if they need to hide their definitions as they do.

The above could be the mechanism by which whole communities are made unable to function and is having characteristics of being the mechanism for something that happened to me but I have been refused the right to get proof of when asked in the form of cranial X-rays for possible head injuries. Exact words: “I wouldn't worry about it” as if already aware of the reason to ask for that specific test. I really never recovered and it is dehumanizing utterly.

Dictator's Mandate: End Program and The funding allocated for this coverage is to be divided up as a cash payment to all Medicare recipients equally can then choose if want to spend on a religious instituotion

- Truthfully behaviors that are not constitutionally valid crimes are not the realm of government to regulate. Like at all. That is the realm of free-will, personal choice, Religion, and societies of free association.
- **The only non-religious reason to go to a psychiatrist is to obtain: Amphetamines, Methylphenadate, Benzodiazapines, and honestly I hate antidepressants but some people like those thing= stomach upset**

Dictator's Mandate: No. The Poor and Desperate get Medicare Coverage. No involuntarily enrolled studies whatsoever. This is the Realm of Voluntarily Enlisted Subjects Who Get Full Disclosure and Financial Compensation is the Motivation= not coerced by lack of covered healthcare! (I am glad I used too much to expect anything other than DEA retaliations and death threats in response to the demand that I request an early fill of my medication dextroamphetamine sulfate today and went back to the one, I almost let it go) **A study requires a control that doesn't know if they are being treated or not but must abstain from other medication! Dictator's Mandate: Either Drop this coverage altogether (Alzheimer and other conditions will be self-

reported I guess and that is not as comprehensive but it can never be used for social engineering.)

OR

Use it for the only viable purposes (over-riding the prohibitionists that are my Prey now in the Legal Sense: 4th/18th/21st They GAVE OUR BASES/Weapons TO THE TALIBAN!!!!!!

Seriously we never really could tolerate them to begin with and they needed their "never been convicted of a drug offense" requirement to be in a position of government that makes policy decisions such as whether or not the 4th/18th/21st Supreme Law is Enforced (They really are going to be charged and prosecuted fully for the fact that they NEVER EVER HAD QUALIFIED IMMUNITY_ and EVEN IF I DIE : SO HELP ME GOD

- 1.) **If this was really for the Patient I Ryan Thomas Hock would not have been denied the low-dose Diazepam prescription I asked for in my last appointment and disclosed it was needed specifically because I had Read the Medicare Handbook and KNOW that I have to revise it and somehow get it approved in my form for myself before I need to use it?! It really voids this as viable to not be able to over-ride a DEA prohibition when the need comes from the polices of the DHHS and DEA. It really is the "system that corrects for its-self" against being useful.**
 1. Look you want to keep this provision of funding that can be useful in times of way-too much asked of someone (as in me right now) but without option to fail (as in me right now): then it is only for the confessions of the patient as to what situational difficulties are causing the PHYSIOLOGY to show concern. The Fact is at this time I am showing undeniable symptoms of the efforts taken to survive and beat the fucking damned DHHS and DEA run Medicare DEMAND.
 2. I asked for an early fill of dextroamphetamine because my version was poisoned by DEA/DHHS DECREE That was denied again out of TERROR Forcing me to try to extract the real drug and suffered immensely but it was not optional for both the reason of VOTING and housing being deprived of me in a very short time-frame.
 3. Next time I go in I will have to ask for less than I truly need as is always how it works when the Outer party is in charge: I have next to no faith that the early fill request I ask for and co-prescribed low-dose Diazepam will be even considered possible to comply with and only out of absolute Terror of the DEA.
 1. Look I know the blood-pressure will be cited but I have not had my requests honored and sleep is not an optional thing to control blood-pressure; so I could not behave as I personally see as responsible (You cannot will yourself to sleep when you know you have not yet done enough to solve the EMERGENCIES in the VALID definition not the EXCUSE to kidnap. For real though it's a distraction campaign to have to fight a never justifiable to exist DEA So please no more of their restrictions b/c they are TRAITORS and know I am coming for them b/c I have no survival chance if I don't So it is not OK to be under their demands for DEATH WORSHIP BY INEFFECTIVE TREATMENTS

Part B Covers some injectable or implantable drugs to treat a substance abuse disorder when a provider administers it in a doctor's office or a hospital as an outpatient.

- **Dictator's Mandate: Remove this provision without option for prior authorization or any other method by which someone can be forced into organ failure and other disease states because things like anabuse, Azo dyes and related never medical substances are all poisons that cause severe medical problems**
-

Page 40.) Emergency Department Services

- **Dictator's Mandate: Define specifically “illness that quickly gets much worse”**For example the lie of psychosis describes the reality of if we are allowed due process our true dangerous to the violators of rights under color of law is negated and therefore the illness of Justice doesn't quickly get much worse:
 - **They Cannot Cover Emergency Room Visits for Religious Definitions such as those of the DSM-5 known to all real sciences (can transfer skills to other jobs as in not only able to repeat lies that don't hold up to situational usefulness).**

Page 41.) Eye-Glasses: Originally worded to be unusable for almost all: If you have cataract Surgery that implants an intraocular lens, Medicare covers one pair of eyeglasses with standard frames (or one set of contact lenses). Medicare will only pay for contact lenses or eyeglasses from a supplier enrolled in Medicare, no matter if you or your provider submits the claim.

- **Dictator's Mandate: Fuck this rule! You are telling me that Medicare is willing to cover poisons and people without valid credentials at six-figure plus incomes (psychiatrists) whose only function is to push poisons and cull the hers of medicare. Straight-up if Medicare is designed to Murder us easier: This is the “Smoking Gun” because 1st off I have the right top see as clearly as you considering this is a dirt cheap thing compared to all the rest of the coverage.**
- Demand: Cover a standard pair, and a “Adaptive pair= your choice of: transitions lenses, prescription goggles, and have option to waive other covered sections as I've been doing (but of the remaining that are unlikely or not applicable) to make a value for the visually normal and that is a pair of a top of the line data-display based glasses that could also be a phone etc get creative on this one because they sure as all hell did. I remember the early research papers on reading the electromagnetic signals going through the optic nerve meaning they might have mandated a “bionic eye” or it could be benign.

Ok speaking as a person who knows for a fact that the lack of eyeglasses is a severe disability for people who need them. I sincerely doubt I could have managed to type this if without glasses.

→ Page 46.) Mental Health Care (Outpatient)

- **Dictator's Mandate: Remove this section and give the personal allocation of finances to the beneficiaries (Patient as is the VICTIM if Covered ex Ryan Thomas Hock is the beneficiary in this wording not as the truth of use of funds has historically been the DHHS/DEA Rebellion). Suggestion encourage the use of that money to donate to charities of their choices. This for real is going to improve outlook and so-called "Mental Health" significantly more than any psychiatrists**
- Encourage a form of "Tithe" were this money can be used at least in part to Vote on the things that matter most to you and make you feel good to support by donating a small percentage to the charity of your choice.
 - **This Mental Health title is now only going to make me think Terrorism and Treason. This Section is to be Removed in the vast Majority and the few covered medications of value (not evaluations that are tests of your ability to lie and to turn your back on the Constitution (4th, 18th 21st))**
- The Practitioners who used harmful methods and treatments need be brought to justice.
 - If it were up to me I'd say we should put the Damned worshipers of Baal (self-mutilation such as Anti-psychotics and mood stabilizer) Moloch (Human Sacrifice particularly of children but really it means to sacrificial the legally vulnerable betrayed us to the Taliban into chains and drag them kicking and screaming to the Capital Buildings and test the Congress that wouldn't let a large percentage of my People vote on (As an act of open Rebellion they denied the Right to vote to innocent citizens who show exemplary courage and Patriotism but most of all: the kindness towards your fellow man that is utterly absent in the abstinence culture that is NOT REPRESENTATIVE OF THE MORAL MAJORITY!!!!))
 - The test is simple: will you hang true Traitors by the neck until dead? Because God/Yahweh/Allah has one never allowed to survive and no it is not Satan, who is self-interest and greed; it's the worst state-married Theocracy that has Rebelled against the Empire of the Constitutional Republic

→ **It's Time to Crush the Rebel Alliance of the DHHS/DEA/ Taliban (we never abandon bases ever, they didn't fall they got ordered to leave enough resources to the enemy that the true Allies in Afghanistan (seriously they are the opium farmers that supported us and they cannot rise against a so heavily armed by the weapons of their former Ally (USA until the DEA got stationed in Afghanistan including the Bases that are fortresses and a hell of a lot nicer than a cave.))** It is treason they did to gift to our mortal enemies the Moloch worshiping (they Murder by chopping off heads for only their growing of poppies such as we encouraged and protected with those bases. The opium farmers stayed very close to us and are true Allies and devote Muslims who honor the same hatred towards the self-mutilators and Human Sacrifices that The never true Muslims: Taliban

- **Change to Primary Care Physician, Internist for the only purposes-normally reserved for psychiatrist= access to illegally and unconstitutionally regulated medical necessities that enhance functions and cognition without using the Murder-Derived Brain derived neuronal growth**
 - I personally consider Mental Health to be an opinion-based form of religious mambo-jumbo. The sad thing being they forced it upon me for years and with great detriment only maintaining even a semblance of being doctors by prescribing
 - Amphetamines/ Dexedrine/ Adderall/ Vyvanse
 - Methylphenadate/ Ritalin

Page 56.) Paying for Long-Term Care: Not normally Covered by Medicare Meaning they intend for this to be the realm of Social Security Retirement Benefits.

Should pair with still cognitively capable for many (is not defined only need the ability to teach English before any form of repayment of debt in care could be expected) years to come elderly who will get the duty to teach them Proficiently in English and Constitution/ civil real history based. The recording of their lives and stories can then be the duty of the people we rescue and assuming a real bond is formed might also solve the long-term care issue: People can still recount their lives in the state considered "Their Time" by what I know is called "Death-care" by the employees whose ties to the elder are non-existent.

The Greatest Generation types might actually prefer it if you draft them for this into real military-active duty classification for this task and take it seriously. The stipend=chance

➔ Perversion ex: Federal and/or DHHS employed Psychiatrists have one required credential that is never ever waived: "Never Having Had a Drug Offense Conviction" Meaning that they don't use the People's Medicines of Enhancement and Life-Extension. Therefore don't have the antidotes to their poisons:

Methamphetamine {reverses Major Tranquilizers and is the exact opposite of Haldol}, **Cocaine** {reverses Major

Tranquilizers and is best as crack cocaine for emergency use to for example flee the police when they try to illegally arrest you to take you to a psych ward; side note crack cocaine has been beyond a shadow if a doubt the best treatment for COVID-19 so much so that it kept the "Essential"

workers able to work {and literally stopped the utter collapse of the economy}, **Marijuana** {induces neuronal growth/repair and provides lasting protection}, **LSD** {induces brain growth/repair and helps with the serotonin deficiencies of Atypical antipsychotics such as Saphris}, **MDMA** {induces brain growth/repair and helps with the serotonin deficiencies of Atypical antipsychotics such as Abilify}

➔ They do often take antipsychotics themselves (to prove they are "safe") and therefore suffer major brain and organ damages that lead to death if untreated.

✓ People with resources don't just lay down and die. I find their lack of illicit drug use to be the absolute strongest indication of incompetency in regards to the "advantages and disadvantages of drugs"

✓ Combined with their self-mutilation from antipsychotics = beyond disturbing: b/c the psychiatrists don't often show the symptoms of Antipsychotics that even small doses in short time frames cause in their victims.

✓ There is little doubt that the Psychiatric Cartel (especially DHHS) are addicted to "Satan's Medicines" = they must be using brain-derived neuronal growth factors (BNGF) to maintain the appearance of competency. Embryonic Stem Cells from Abortion as an alternative also works to repair brain damages.

- **Brain-Derived Neuronal Growth Factors** (harvested from dead humans; note anti-psychotics dramatically increase the harvest-able quantities as they are produced in attempt to heal the damages caused by anti-psychotics) and Embryonic Stem Cells derived from Abortion are available to them (1

KNOW b/c as a Biochemist I had been able to access that {open but illegal} black market).

✓ Finally their organs eventually fail if they use their own poisons even if they counter the brain damages with the (human-sacrifice derived substances) BNGF

➔ Psychiatrists unlike any real scientific field: have NO translatable skills for other employment. Meaning they are 100% beholden to the lies that got them named “Quacks” hundreds of years ago

➔ 1st Amendment Immunity also Applies: By the definitions of the Christian, Jewish and Islamic holy texts: Involuntary DSM-5 Psychiatrists are Worshipers of Baal (self-mutilation=antipsychotics) and Moloch (human-sacrifice in all forms but is historically mostly children=the legally vulnerable which is equivalent to the elderly and disabled typically targeted by the DHHS) as per the use to commit Election Fraud/Voter Suppression {Bill of Attainder such as Ch.51 usually} however the primary motivation to worship Moloch seems to be for the purposes of securing and harvesting Organs, Tissues and Factors.

- ✓ They receive funding from Government and “Dictate” public policy as a “Belief-Based” Religious entity (they are a religion; we the real scientists have defined them as such and named their DSM-5 the “Psychiatrists Bible” (sometimes also called the “Devil's Bible”) Who uses arguments of Belief to justify their unconstitutional practices and via the Title of Nobility of:“meaning of the facts” have claimed a form of “Papal infallibility.”

- And they came for me in heavily armed & large numbers=more than I witnessed the time it was for Willie Cain: a neighbor who had pointed a handgun at a random passerby across the street from the building__allegedly & supported by security camera but lacking the actual finding of the firearm in a building with camera footage showing his only positions to have been the hallway, his room and the bathroom_and despite a \$500 reward no one reported finding it. I mean I sure as all hell looked for it in all those locations: actually I was the one tasked with cleaning out his room where I found his social security card/important shit and like a gold-colored possibly plated spoon etc. I went to the jail where he was reportedly held and tried to turn over his property for him to have ya know equal protections of the laws but the guards/staff refused to take it citing “COVID-19” and that was that (he was on SSDI {would need the documents/cards for financial access to equal protections of the laws} and had major communication issues stemming from forced anti-psychotics_ which also brings the question of how he got a handgun =questionable/= wasn't located and therefore a major evidence required was missing_I also suspect that the public was only told he was incarcerated there awaiting trial public trial; indicated by the “COVID-19” excuse to not take that kind of personal property for an inmate. He was probably put into Winnebago Mental Health Institute: which can be one of the worst; DHHS-run with staff who will with a smile on their face reassure you that “We don't do lobotomies anymore” and then go back to finding excuses to inject haldol into their current Human-Sacrifice displayed for us to watch in terror as he got worse and worse with each injection becoming more retarded, angry and violent and in my case KNOWING that they were shrinking his brain: reports of 10% or more)
- x I had already been petitioning my neighbors and community for assistance via handing out copies of the Federal Constitution (purchased from the ACLU) and pointing out exactly how plainly Unconstitutional Ch.51 is and without a shadow of a doubt being enforced in clear violation of the Oath of Law-Enforcement (=no qualified immunity)
- x When In was informed that they were storming the building looking for me; it became obvious that I would not be getting a public trial (ch.51 is done in secret/not open to the public or normally on public records) I desperately needed to testify what I witnessed happen to others (Murder and Equivalent to Murder) in a real Constitutionally valid court (in the sense of Public Scrutiny at a bare minimum in this example) and knew that I could easily be murdered in the psych ward etc if having no record of my kidnapping/chance to appeal to the public (real trials in real courts are always {100% no exceptions whatsoever; courts are for crimes and the sometimes crimes of violations of contracts} =Need for Public Awareness and Support due to lack of Constitutional Due Process

 - ✓ I met the Oath-Breakers in the hallway and had the pipe placed in basically plain view in my breast pocket.
 - ✓ Another Neighbor (unaware of the pipe/desperate plan) saw what was happening and tried to stand up for me by begging the officers to “just leave him alone.” They didn't seem phased and ordered him to cease talking and go back to his room.

- x number of other neighbors appeared to see/witness what was happening (might have also been recording video) They searched me pretty much immediately while I desperately rattled off a shit-ton of legal realities that made it impossible for them to be ignorant that they were in the action of committing a heinous crime for which no immunity exists. As soon as they found the pipe I proclaimed loudly and repeatedly things like “You have no choice but to give me the Rights of the Accused and a Public Trial” and “I need the Rights of The Accused to be able to testify against Ch.51” and the like <no confusion existed as to why I let them catch me with something normally prosecuted harsher than most violent crimes> The officers involved became clearly understanding of the situation and took me into their squad car where they attempted to get me to waive the 5th by the question of “was it only cocaine?” to which I responded similarly to: “They gave me anti-psychotics using violence and caused extreme disabilities including fatigue and retardation that prevent me from accessing the Judicial due process and having Constitutional Rights.” <so I didn't admit to it having been a crack pipe or any form of paraphernalia_other than by the implied meaning of begging for “The Rights of the Accused.”> They then said “Not Fentanyl though?” and I replied that: “I don't mess around with that stuff.”
- ✓ I begged them to take me to jail instead of the psych ward, but they refused.
 - I'm actually not sure if I'm ever even allowed to go to jail/prison {No crimes committed worthy of such but they typically violate the constitution with regards to drugs and imprison people anyways and in that instance I literally begged to go to jail} however being accused of “unspecified psychosis” might be a “Title of Nobility” that means you never go to Jail or Prison: You go to the psych ward =meaning I could murder someone and because of being called “incompetent” get a short (relative to a murder prison sentence) sentence in a psych ward followed by group home(murderers might prefer: you get servants and everything provided for you; only they force poisons on you and don't let you leave on your own_I did anyways but the staff liked me {and probably only because I threw up the poisons not sacrificing my personality}) or community supervision.

The only real skill is communication and moral factors of the patient. The ethics of the Nurse matter.

➔ remember that the elderly get Social Security Disability Insurance usually at the maximum rate

(b/c unlike me they were not kidnapped and subjected to deprivations of rights under color of law preventing them from being allowed to work (literally when the DHHS found me last time in West Allis they first found my job and scared my boss into firing me, waited for me pick up my last check and followed me back to my residence)

and Never to include Psychiatric Ward as a skilled nursing facility. (They have zero skills whatsoever and simply drug their human sacrifices at the threat of a firearm to keep us from successfully rebelling and freeing ourselves)

- It is obvious to a victim of ch.51 such as myself that this is the mechanism used to cover the largest percentage of the revenue of the Treasonous Psychiatric Cartel. They use unconstitutional mechanisms of outright corruption such as Ch.51 WI Statutes to order the police/law enforcement to break their oaths and act as “Fugitive Slave Catchers” and outright Murderers of innocent people; then use antipsychotics, lobotomy, electroshock, mood stabilizers etc (The Never Medicines) to make their involuntary victims (rumor has it they have been involuntarily committing the homeless in massive numbers only on the grounds of “being homeless” as proof of their being not worthy of Human Rights) unable to contest their situation successfully and via being MADE unable to perform the “Activities of Daily Living.”
- It is a system that makes a need for itself (causes the conditions meant to treat)
- For example: Waukesha County Mental Health center charges over \$1000/day/victim under this category and refuses to allow their victims to leave unless signing a “voluntary” consent to “treatment” and agreeing to report for utterly disabling poisons such as abilify injections (seriously Contract Law Basics: Violently Coerced Contracts are NEVER LEGAL or Enforceable)

I did fax a copy to Medicare after eventual release along with a letter that should have ended this as a risk: I already ordered medicare not to cover this or anything else unconstitutional with very detailed descriptions. This didn't stop the attacks against me but might have made them more frequent (I have been illegally arrested and tortured over 11 times {lost count})(sometimes close to the point of death ex. Waukesha County Mental Health Center: Zyprexa injection given as punishment for refusing to “voluntarily” take abilify by injection; resulted in rebound hypertensive crisis that lasted more than a day and reached levels as high as 200+ish/100+ish which put me at risk for death and failing that sterility.
 - ➔ The clinical standard for emergency hypertension is benzodiazapines usually diazepam because that work quicker and are more effectively in the short term lowering of blood pressure than any so-called first line treatment anti-hypertensive (used long term because not considered addictive.
- ✓ They outright refused any treatment whatsoever at first and for a long time while I begged and eventually screamed at the top of my lungs that they were trying to sterilize me and wouldn't even give me lisinopril (they had also refused that after I asked for the diazepam and was refused b/c of intentional malpractice)
- ✓ After making a giant and utterly ridiculous scene, they finally gave me lisinopril which works slowly. Maybe by the next day I had normal blood pressure similar to before the zyprexa; but now requiring daily lisinopril.

 - **Dictator's Mandate:** Do not cover for anything that is not justifiable. This should have been obvious but if an ambulance is needed, there is a physical medical emergency that could require treatment (not chemical lobotomy as form of restraint used in process of slave-catching= Haldol and other injections they give those who even verbally object to being kidnapped)
 - Train Paramedics to have the courage to recognize and refuse an illegal(s) order from the Police etc.
 - The primary reason to use an ambulance for enforcement of Bills of Attainder/ etc Treasons and insurrectionist activities is a form of attempt to justify to the public why the illegal event disturbing the peace witnessed was not reported in the news or public records
 - This is exactly the mechanism Hitler's Germany used to initiate the Holocaust; they didn't first target the Jews; it was the same as in the current violent insurrection. The worshippers of Moloch sacrifice first the Vulnerable/ legally defenseless (in the religious texts it was typically children) and as in Nazi Germany,
 - The first victims are the elderly and disabled.
 - The next targets are always the first to notice this and stand up: the drug users, dealers and manufactures who regardless of the hate speech against them always support and interact with the elderly and disabled to make them live healthier, longer and be capable of work and other things despite disabilities: and oftentimes represent the absolute most capable people in any society who can also make others more capable (therefore the most dangerous to any form of Tyranny: and that is exactly the label used in secret courts of Bills of Attainder: "Dangerous"
 -
 - This is the single largest financial incentive of the emergency room hospital without it's own Psychiatric unit to accept Patients they know are being used to commit fraud against medicare, insurance
 - it is a mechanism to make their round-ups and operations appear to be legitimate functions of emergency response to save lives
 - This is pretty much what Hitler Started With

 - **I vote to remove this provision and for my healthcare please do altogether** because I find the level of encryption and added layers of sketchiness and purposeful use of unreadable formats to mean they have covered procedures I seen evidence of having occurred that are never medical ex: Sub-Orbital Lobotomies. The risk is too high: there are few surgeries that release within 24hrs that could be classified as emergencies needing approval without the patient's express consent (ex emergency tracheotomy). The reality is though that Emergency room care is always given for true life-threatening immediate risk conditions; then the insurance is billed after and with the gratitude of the patient.
 - There are only horrible things I can imagine that would fit the criteria of “being performed without consent = why needs coverage determined blankly” and those that are expected to release in 24hrs are the ones that are not for major life-threatening conditions and/or performed out of Hate and without care for the patient survival (realistically the lobotomies are so obviously for the purpose of making you die easier and sooner without being blamed on the entities that harvest the body for parts and/or collect the estate.

 - I know Psychiatry to be a Religion. And when reliant upon Government to give them involuntary patients, it is a violent state-married Theocracy that is banned by the 1st amendment.
 - I know that some people are true believers in having another person choose if they succeed or fail and crave their approvals and other motivations that make zero sense to me.
 - Therefore since those not so independent or confident people (if as practiced by DHHS and modern times etc) have the right to choose a religion that is not funded by the state: the funding allocated for this coverage is to be divided up as a cash payment to all Medicare recipients equally.
 - They can choose to take that to their dark-priests or whatever and although I hate Baal and Moloch;
 - Moloch has an absolute ban and we are to wage a holy war against the practices of Human Sacrifice. (any war against a Theocracy is a Holy War)
 - Baal they can't be constitutionally prevented from voluntarily committing self-harm if truly understanding what it means and are beyond the age of maturation cognitively and independent of those who would coerce such (like Parents). This is not something I expect to happen in a Nation with the availability of real medicine so that the Quacks can't push their lobotomizing date rape drugs as replacements for opioid painkillers so demonized by the poisoners.
 - **The only non-religious reason to go to a psychiatrist is to obtain: Amphetamines, Methylphenadate, Benzodiazapines, and honestly I hate antidepressants but some people like those thing= stomach upset**

- (I managed to more or less befriend almost all of my captors but that was only possible by refusing to absorb their poisons and also I was beyond honest with them in that I threw up in plain view daily and used my knowledge from biochemistry and tutoring skills to really get most of them to see the realities that as primarily very young high turnover temp workers exposed almost exclusively to the artificially violent resultant creatures of Antipsychotic use =things like being frustrated from being unable to communicate leading to punching a hole in the wall etc things they simply made worse by their choice of punishment chemicals that result in those same observations as intended to treat.
- Actually in fact all the group home staff called to testify against me, told the truth as best they could or perceive: in any case they were unanimous on me not needing their poisons/anti-psychotics as I had no issues when not taking them which was the whole time, and they knew because I threw up. I had to pretend to succumb to the saphris *(too much a bi*tch to prevent as I had to plastic wrap my tongue before reporting to be watched for 10 whole damned minutes by the staff who had orders to verify I didn't throw up or spit out the dissoluble. I kept most of the pills from dissolving this way and after being allowed to leave the common area, I spent lengthy amounts of time "salting out" my mouth, using various concoctions of Myrrh and Frankincense and scrubbing my mouth lining with charcoal. Then I went for long runs during which I kept spitting constantly.
 - Despite all those efforts: that particular Anti-psychotic was horrible even in the maybe 10% of intended dose absorbed (ok the facts; some of us have specific blood types and a higher body price than you who might not ever have to think about a risk I was aware of since as young as 8-10 when I first learned the meaning of "Universal Donor."

Page 34.) **Clinical Research Studies: Fuck NO!** Don't consider Censoring: is an appropriate use of language and no one gives a shit about God-Damned Political Correctness that leads to the inability to communicate ineffectively. The idea is to show that this is not negotiable. **The Health Coverage is Individual so every damned dollar must be beneficial to the patient and is at the cost of lives as per what the difference is going towards and is a guaranteed cost by the reality of we have never saved them all. So really be aware when asking for something not proven what you are costing.**

Case studies done with data from records can be done after discontinuing care or some ethical use.

Really truly beneficial medication worth using will be proven beyond a doubt by the non-human animal studies: and your lucky to get the free reign on that; and be cautious because I really do know cats and dogs are persons. So maybe be real effective and don't accept studies from entities like the DEA! The fact is the not so obvious medications are not having effects that are measurable.

That is the real issue: they have made very few new real medications in the recent era; mostly less effective versions of what came before and only by the violation of 4th/18th/21st have they gotten their worthless organ damaging bullshit to be sold and picked up and if the patient is like most: **thrown in the fucking trash.** To instead use the Real medication **your damned clinical studies payments might be the incentive to ban real medicine!**

The Poor and Desperate and elderly get Medicare Coverage. No involuntarily enrolled studies whatsoever.

This is the Realm of Voluntarily Enlisted Subjects Who Get Full Disclosure and Financial Compensation is the Motivation= not coerced by lack of covered healthcare! (I am glad I used too much to expect anything other than DEA retaliations and death threats in response to the demand that I request an early fill of my medication dextroamphetamine sulfate today and went back to the one, I almost let it go)

A study requires a control that doesn't know if they are being treated or not but must abstain from other medication! Like for real NO! This is a Hard No and I am a person who could have War-Profiteered the Fuck out of this one.

If you feel you cannot get truly needed medication without being a test subject Go Public and get what you need because is not your salvation. Know that this is only needed by the patient if denials of real medicine are occurring.

In the instance of you truly believing that no effective options exist: There will be a form to petition for a Medical Researcher to be Assigned who will have funding from the private industry in exchange for using you this way: they cannot have you be an untreated Control or deprive the truth under arguments like the placebo effect (I don't give a damn we are not Nazi Germany, if a patient is allocated money for medical care it is used for that specific patient no more blinded; and yes the mechanistic data derived from specifically in vivo human studies might suffer. Looks like survival and patient outcome is all that will matter_current research on not effective enough to notice or that requires real statistics for some reason {is for future decisions that statistics on this matter but we are dealing with the now and that future data comes at way too high a cost})

Dictator's Mandate: OK Cannot Allow Coverage at this time in this manner (The appointments I agreed to and have upcoming are still needing compensation but need not have the power to obstruct my efforts as is the case with as current—if this had purpose it would only be to override prohibition policies such as the ones cited for why I don't have the resources I need to do this task);

The fact is by giving false diagnoses in psychiatric institutions they have Conscripted real doctors to resort to this to compensate for refuting something that they have only never been allowed to not accept as medical. Psychiatry is not a Medical Field. Diagnoses like “Delusional Disorder” are punishments and Scarlet Letters, not anything in the realm of Medical Doctors and Soo beyond unfair to expect of them to compromise on and accept as real this belief-based diagnostic system.

This is Horrifying because they think this too much not relying on tests that are not subject to human error is enough to give a Diagnosis that could be used to harm the patient dramatically. Obviously we have

This is a issue because they use this specific evaluation to make decisions about who to let the Government Murder. That is no exaggeration. The legal term used to describe me in the utterly treasonous Waukesha County Rebel Outpost of Ch.51 Fake Court was “Mental Defective” The argument was mainly my objecting to their calling me that.

The fact that I am knowing I am going to fail this way because of the need to undo medicare and a impossible issue of the distractions of fighting against the Damn DEA who makes a belief-based system that you must fight constantly to get the resources you need and cannot use as needed because they were diverted to fighting the god-damned worthless DEA who frankly all evidence indicates is Allied with the Taliban and the death cult worshippers of Moloch in general.

OK NO to the classified list of criteria for review of cognitive condition. We are not able to evaluate the truthful medical use vs Social Engineering. The use of difficulty managing Finances part is UTTERLY UNACCEPTABLE

This should not be worded like this. Some parts are indispensable aspects of a real evaluation for disease and symptoms but are not used as specific examples (ex Do You Stutter? Is a side of the face higher than the other? Are the eyes twitching? Etc)

The thing need be completely re-written and disclosed as to what power over us it has because:

- 2.) If this was really for the Patient I Ryan Thomas Hock would not have been denied the low-dose Diazepam prescription I asked for in my last appointment and disclosed it was needed specifically because I had Read the Medicare Handbook and KNOW that I have to revise it and somehow get it approved in my form for myself before I need to use it?! It really voids this as viable to not be able to over-ride a DEA prohibition when the need comes from the polices of the DHHS and DEA. It really is the “system that corrects for its-self” against being useful.**
 1. Look you want to keep this provision of funding that can be useful in times of way-too much asked of someone (as in me right now) but without option to fail (as in me right now): then it is only for the confessions of the patient as to what situational difficulties are causing the PHYSIOLOGY to show concern. The Fact is at this time I am showing undeniable symptoms of the efforts taken to survive and beat the fucking damned DHHS and DEA run Medicare DEMAND.
 2. I asked for an early fill of dextroamphetamine because my version was poisoned by DEA/DHHS DECREE That was denied again out of TERROR Forcing me to try to extract the real drug and suffered immensely but it was not optional for both the reason of VOTING and housing being deprived of me in a very short time-frame.
 3. I have next to no faith that the early fill request I ask for and co-prescribed low-dose Diazepam will be even considered possible to comply with and only out of absolute Terror of the DEA
 1. Look I know the blood-pressure will be cited but I have not had my requests honored and sleep is not an optional thing to control blood-pressure; so I could not behave as I personally see as responsible (You cannot will yourself to sleep when you know you have not yet done enough to solve the EMERGENCIES in the VALID definition not the EXCUSE to kidnap. For real though it's a distraction campaign to have to fight a never justifiable to exist DEA So please no more of their restrictions b/c they are TRAITORS and know I am coming for them b/c I have no survival chance if I don't So it is not OK to be under their demands for DEATH WORSHIP BY INEFFECTIVE TREATMENTS

Straight-up if Medicare is designed to Murder us easier: This is the "Smoking Gun" because 1st off I have the right to see as clearly as you; considering this is a dirt cheap thing compared to all the rest of the coverage.**
- Demand: Cover a standard pair, and a "Adaptive pair= your choice of: transitions lenses, prescription goggles, and have option to waive other covered sections as I've been doing (but of the remaining that are unlikely or not applicable) to make a value for the visually normal and that is a pair of a top of the line data-display based glasses that could also be a phone etc get creative on this one because they sure as all hell did. I remember the early research papers on reading the electromagnetic signals going through the optic nerve meaning they might have mandated a "bionic eye" or it could be benign.

Ok speaking as a person who knows for a fact that the lack of eyeglasses is a severe disability for people who need them. I sincerely doubt I could have managed to type this if without glasses.

The lesson learned is that if you deny us something we need, your going to be required to more than make up for it, and no requiring a surgery that implants a device so glaringly similar to the implantable camera that is powered biologically and whose images and video are read from the electromagnetic radiation output that uses the neurons as antenna. Was that AWARE ENOUGH FOR YOU?!

Page 41.) Federally Qualified Health Center Services: Very broadly defined and unknown to me at this time as to if represents a valid expense or a cover story for the horrible bull shit like the rest of this paper. Probably both.

- Dictator's Mandate: Question as to why a different class than "Inpatient /Outpatient when does the same things.

Page 43.) Home Health Services

- Could be a great program for the elderly and too disabled. Might be abused if applied as I saw in group homes.
- **Dictator's Mandate: This is never to include involuntary Services Like Medications that cause the being home-bound etc and/or the de facto prisons called group homes and "community living" and other ways to get more money out of a program meant to be reserved for the Elderly.**
 - If under the retirement age and on Medicare for Disability then this program is not meant to apply to you as we are NOT INCLUDING OBESITY as a qualifying Disability. Note: Antipsychotic-induced disability is valid and often causes obesity and need only be on the books for one generation as WE NEED TO PROHIBIT ANTIPSYCHOTICS ALTOGETHER as they are not voluntarily taken it is by force of violence and/or coercion and rarely but possibly b/c of an utter lack of other drugs to use instead such as for sleep that is never restful

- Dictator's Mandate: Completely and totally cash out and END this program: Use the entire of the funding for this for the Mission: “Operation Poppy Power” as well as ALL ALLOCATED BY ALL GOVERNMENT PROGRAMS THAT “TREAT” any form of substance abuse or drug addiction AGAINST THE WILL of the Patient
 - ➔ see the success rates that are soo low that I suspect they are close to quitting “cold turkey” and therefore these covered by Medicare options are not really medicine, and can be considered close to poisons but in any case a much more likely to be effective option can be had=opium itself is difficult to overdose on(supported by the Obligations of Contracts and is the Will of the people, especially the armed people who report to their superior officer)
 - ➔ OK full disclosure: I will try to be unbiased but I have a stereotyped and biased view of most opioids. I am not a fan of depressants and think they make people lazy and unproductive. Also my Lyme disease/ADD and etc (it is seriously UNDERPRESCRIBED medication Dextroamphetamine Sulfate breaks down into epinephrine which is the Stimulant Painkiller you get naturally during exercise and works miraculously for lyme disease induced joint pain especially in combination with “the herbs of the earth”..... seriously marijuana like high grade very potent marijuana in decent to large amounts allowed me to completely beat Lyme disease twice and proven to be better off than you by the 10-30+ miles I would run regularly. Not because of the supposed addiction (idk how like do you work a job or accomplish things or is someone else supporting you in every way?) or even the risk of overdose (melting point analyzers)
 - Addiction: Honestly I have zero understanding of real addiction and am not sure it even exists. I am aware of situational hazards leading to lengths of prolonged and excessive use that was more or less without option.
- Risk of Overdose
 - Unknown strength and composition is the primary cause in street opioids. This is rectified by a melting point analyzer which is covered by Medicare and sent to every single enrolled person so as to never be a hit list of the DEA who manage to get away.
 - ➔ methadone
 - ➔ buprenorphine : 25% success rate for buprenorphine
 - ➔ Suboxone: 49% can replace opioid addiction with suboxone addiction. 8.6% success rate overall (<https://www.nih.gov>> navigate to press releases)
 - ➔ Naltrexone: In the publications this is for :
 - opioid: there seems to be a very wide variation in the publications that might depend on dose.
 - alcoholism: 10% success rate (<https://Igoptsiber.com/naltrexone>>
 - ➔ and has a troubling mechanism of blocking brain function related to the reward pathways which makes me wonder if you lose the personality that is dependent upon gaba/mergergenic functions. Does the body become more susceptible to AZO dyes and therefore excitotoxicity. (and would antidote to excitotoxicity =benzodiazapines
- Naloxon: Will not be likely to need from smoking opium: In general you will pass out before you even can inject enough to overdose
 - ➔ The Fact is The supposed alternatives to opioid painkillers they are trying to force are horrific and I swear to you: Antipsychotics that they really thought I would take willingly are not medicine and even Significantly worse than anything I recall from active/initial Lyme Disease or the joint pain resulting from it that I still get today. All Antipsychotics are poisons and they have major consequences for use such as cumulative brain damages.
- (although despite my bias: truthfully could have used a diazepam while doing this Medicare revision duty b/c it is horrifying to understand that these are all mechanisms that are used and for the purpose of causing harm; also I really don't suffer insomnia from dextroamphetamine sulfate free of poisonous additives usually. This task has an unreasonable deadline of today (then there is still the getting to to accept it before being forced to do the armed standoff that is the best possible scenario to result if they come for me {I have warned every law enforcement I could not to enforce a bill of attainder or follow any unconstitutional orders b/c we no longer can believe we will survive the imprisonments and tortures; do you have any idea of the difficulty in talking in such a manner to people who historically get used to suppress such speech?})

➔ This is for now meaning trapped in foreign lands starting with the Afghani OPIUM FARMERS (You said Leave NO ONE behind. I have zero reports of them making it here at all. (obviously the Portrait can only be of known to be compromised such as in a Taliban prison/holding cell at time of printing and /or any of the damned held in DHHS concentration camps including those located along the border that are an act of War against the Latino War as a Whole.

We are possibly the only people who will save them; the powers at the head of government don't treat drug users as human beings and you are likely aware of this. The way too few have come into this country =it must be a anti-drug campaign of outright Holocaust proportions_they are people who think they can scapegoat their betters (work -performance it almost always is because we work too hard)

2. The back with the “Don't Tread on Me” Flag.

➔ (This means Domestic; starting with the Concentration camps at the border and possibly going on to 4th/18th/21st no other violated in combination with adherence to the triple supreme law (Don't drive impaired please, I cannot argue you out of that penalty or be forgiven(able to continue) in open court if I release any constitutionally valid to incarcerate real criminals_pretty much only drug offenders needing rescue in the largest single group. Also political prisoners).

- 1. Promised and Deprived Them by Our Betrayal and by our Promise that Induced them to Come Here only to be kidnapped by the Rebel Alliance of the DHHS/DEA/ICE and subjected to treatment soo horrendous that again it counts as “Enemy Attack”**

Our bases never fell they were abandoned to be used Against our Friends and Allies. Treason Was Committed by Our Government. This Triggers: WI Constitution Continuity of Civil Government and Definition of the Militia.

This Means You are now appointed to fill whatever office and position you are best suited for and is valid constitutionally.

We Never Ever Truly Had in Full effect the Constitution we need to believe in

Therefore to guarantee the Constitution to ourselves and progeny from henceforth we Recognize the reality betrayed by abandoning our strongholds in Afghanistan:

The United States of America as Defined by the Constitutions is able to be referred as:

The Empire of the Constitutional Republic

Together We must Crush this Rebel Alliance of the DHHS/ DEA and Taliban and all others who would dare to defy Liberty and Justice for All!

Therefore Wiping those Worshipers of Baal (self-mutilation; Antipsychotics and mood stabilizers) and Moloch=Human Sacrifice like leaving our solders behind, the end result of psychiatry and the murdering of our Closest Allies : The opium farmers. As in Literally closest,they set up camp surrounding our bases and we protected them from the Taliban.

Save The Union! Save Our Souls!

The Federal Constitution says that our currency is to be Gold And Silver That Makes these notes legal tender for all debts public and private by law.

We did not borrow money from a China that doesn't have the support of it's own people who are actively petitioning the World For Assistance As Loudly as They Can. Because of the DEA/Taliban overthrow of the Occupation and strongholds in the High Ground of Eurasia I see no direct means to help them. We should pause payments until the so called "COVID protocols that they are in open rebellion against are over (satellite imaging required to verify etc.) therefore the gold has a source and need be diverted to this purpose.

The USA government may not have outright admitted this but it is plainly obvious that the debt payments to China are in the form of Gold from Fort Knox (how else would the stored quantities be going down?) Also do you really think a communist government would value pieces of paper backed by capitalistic promises? That Gold was stolen from the poor and middle class primarily and by compulsion of a Tyrant: Franklin D. Roosevelt, who is remembered as "Better than Hitler." He was HATED for this it was the people's real pre-existing social security

Page 48.) Principal Care Management Services

- **Dictator's Mandate: Reverse Roles: The Patient now Dictates as I am now** (well no this was an effort not healthy to undertake and under duress too great to really demand. The reason is that they included “Or cognitive decline” which is being measured and record by the provider; who is able to manufacture made-up diseases and might just do that exactly: if the culture of psychiatric institutions. The patient can obviously ask for any level of health from the doctor.

 - **services to treat a substance use disorder:**
 - I am not OK with this Religion of self-mutilation and never achieving your potential! Those dyes are real poisons. This is the most used method to keep the people down. For example the Center for Medicare Policy refused to grant me a time extension even knowing I have to write my own policy due to the obvious Holocaust.
 - **or a co-occurring mental health disorder (sometimes called a “duel disorder”)**
 - No Coverage for Torture under color of law!
 - **Or for the diagnosis, evaluation, or treatment of a mental health disorder in your home.**
 - Nope no coverage for religion!
- Page 51.) Tests (Non-Laboratory)
 - No involuntary tests. No testing without informed consent (basically no telling me I'm needing poisons because of some opinion-based thing or another based upon: I don't know if you wore sweatpants all day while in a place you were placed into after being kidnapped and poisoned.
- **(No Coverage for Psychiatric ward ever in any case whatsoever, this policy is not open to them getting even a penny!) (ok actually if in the instance of a Plan Member being kidnapped regardless and the situation comes up that we need a paper record, it might be ok to pay a penny for the record that is tied to contract obligations to rescue.** Here is the difficult part: they can render useless a witness in a very short period of time if they want to. It has to be an armed Search and Rescue meaning it must trigger the Warrent from a Judge on the Constitutionally valid grounds of rescuing a person held against their will, but any other applicable can be used if not requiring the waiting: Ex.) “Execution of a bill of attainder, 4th/18th/21st.”

- **Transitional Care management services**
- **This appears to be a mechanism to maintain control over the victim indefinitely as this is likely the funding method for the Ozaukee County DHS/DHHS agents who would torment me every morning and make**
 - **Dictator's mandate: Remove this coverage from my policy**
 - **The Funds allocated towards this program for me can be used for the Missions outlined in this document regarding the Persons left behind and illegally imprisoned:**
 - **Concentration camps are really not having any argument now that we are not so close to China and have no reason to justify their actions by doing them ourselves** (The Coward's peace strategy is to be a slave that gets slightly better table scraps)
 - All the So-Called Mental Health Funding is now to go to these ethical and useful purposes Not to be misconstrued into taking away my Lyme disease/ ADD Medication dextroamphetamine Sulfate free of poisons.
 - I also have the right to have Benzodiazepines in situational prescribed amounts and doses again without deterrent dyes or other poisons.
 - This Policy and all Providers Paid Hereby Have a Contract Obligation to disclose to with every billing statement the following:
 - ➔ This policy is designed to maximize the benefits to YOU the actual person getting the healthcare .
 - Is the goal for government benefit program if I am not mistaken; whereas the goal of private health insurance is to only pay now to pay less later while taking in same or more money etc .
 - I think it is almost always a combination where especially drugs like my Lyme disease medicine are requiring the government funding which is easily used to manipulate companies towards some goal or another of the politician.
 - dextroamphetamine sulfate is demonized therefore jacked up in price and therefore insurance wants to try cheaper: Then the poisons;
 - ➔ This policy is not for the benefit of some other person who sadly is waiting for a transplant.
 - As such even if you are a registered Organ Donor your Health information will be kept private from Organ Procurement Entities unless you are signing a request to be put on the transplant list.
 - This may seem cold-hearted but if you opt to donate a kidney while still alive: you will no longer be covered under this policy as you have chosen to make your healthcare more expensive in a manner that does not provide a personal benefit in terms of work-capabilities and abilities.
 - Potential donors will not be on the donor list until they have passed away and their organ donor status is revealed (this policy will not share with private or Government agencies your blood type even if given an order so wearing a medical ID might be wise). Obviously you as an individual are free to disclose information as you please: but then you know it was disclosed.
 - ➔ You are expected to maintain your end of the bargain. We will give you the resources you need maybe even want/can use, and will not subject you to things that are to make you weak and die: such as Anti-Psychotics which are having the sick reality of being broken down by cytochrome P450 which means that smoking of tobacco up-regulates cytochrome P450 making those poisons not last as long and be weaker comparatively. You will only be made stronger by our interventions that require your consent and ideally your initiation. I am too busy to be a watchful "Big Brother."

- Page 52.) Transplants and Immunosuppressive drugs
 - Dictator's Mandate: Getting rid of most of this coverage for our members. This plan does not cover you being an organ donor while still living and you (kidney idk any other that is lived through)
 - Because of the intention to couple the Life-Extension Insurance
 - =Pays in deterrents to government-level murder
 - =The Most Baddest Ass Weapons greater than Military grade if practical for the missions. At a minimum a small armory and Kevlar lined suit=your funeral suit potentially IN THE REALISTICALLY WORSE CASE SCENARIO
 - but also because I specifically want customized Kevlar suit and jacket such that I could gon to a fancy masquerade ball with itand this slipping into a rule of personal interests is common practice of corruption that benefits others (equal protections of the laws)
 - Bone Marrow donations may be covered in terms of stipend over the two-month+ recovering time. The recipient and/or the insurance of the recipients is expected to at least match this stipend as Two Months and extreme pain are not something to take lightly. There is also an option to subtract the cost of storage (unless done independently) to take a small portion that is viable and storing it for yourself to own as property that is relevant mostly because of intended innovations of EVIL \$\$: bone marrow can be used to grow/make blood and if housed appropriately and nutrients etc obvious enough for you?
 - Page 53.) Travel
 - Dictator's Mandate: unlike Medicare this plan if traveling as part of the Mission requirements to receive the property/ resources including firearms etc
 - Then we have an obligation to provide full equivalent coverage to if at home. With a Caveat: You cannot get coverage abroad if you refuse to change your organ donor status to “not a donor.” Can change back once you return (ideally with your Person(s) Rescued.
 - Is to be voted on: do we supply a vial of mercury or other means to render your own organs useless if you know you will die? Perhaps dependent upon country.
 - May apply for expected travel coverage; but don't be surprised if you get asked to do some form of minor mission (emissary, good-will, support for a major mission etc.)
 - If placed in a foreign psych ward and/or wrongfully imprisoned and/or as a direct result of the mission parameters we will devise a plan individually before the mission that is classified. The goal is to never die and not let our Allies die etc.
-

- Page 53.) Urgently needed care
 - This is defined in medicare as not a medical emergency.
 - **Dictator's Mandate: Never to include psychiatric care. Never to include anything defined as “certain” in the publications**
 - A “certain Procedure” was mentioned in one of my old diazepam prescriptions information packets.
 - Whatever the procedure that diazepam is sometimes prescribed to prepare you for). Not beyond shadow of a doubt level quite yet of having happened and less idea as to whom is guilty (possibly Charlene in all honesty b/c who other than a DHHS employee would of that which left me utterly incompetent for many months. And for weeks I was so much barely able to respond to people in real time.
 - Outside my house a Woman claiming to have been homeless and calling herself Charlene appeared (olive to tan skin tone, around 5ft and had a neck tattoo of a grimora (used to “bind demons” hers was a star of David with a circle around it. They are specific to demon if I remember my high school dabbling in history. You would recognize the one for Satan= a pentagram with a circle around it.
 -
 - While I was in this injured and unintelligible state she had approached me in my backyard and asked for a place to stay.
 - Remember I could barely understand the question in the sense of the responses didn't form in my brain.
 - I did let her stay which turned into months but eventually long story short she attacked a neighbor with a Machete then she eventually tried to lunge at me with a knife after the police had ordered her to leave b/c of the machete incident and all my neighbors chasing her into my house when she screamed “grab your gun” To which I had replied “WTF Im not going to shoot my neighbors, I like my neighbors. At that time I had come to be quite annoyed by her.
- Mentioned because after she was gone I found her resume which had:
 - (Note: she had a characteristic clearance well invite her there.
 - Department of Health and Human Services (DHHS)
 - followed directly by
 - Rock Picker (prison/job labor)

She has a bullet wound under her breast. At one time it slipped from her speaking that she was a “Cop-Killer.” She was only 22yrs old

- Note: if you are in a place without access to safe meds:
 - we reserve the option to expose government corruption to use the qualified immunity to deliver the need to you.
 - This can include a need to function at work-capabilities: ex. My prescription is essential for many things including driving. If only poisoned it was a lethargic existence..

 - Meaning the Obvious insertion of the DHHS/DEA propaganda mission to replace opioid painkillers with horrible kidney killers (Audit need be done to see if formularies and preferred treatments etc are the cause of the seemingly predicted to be on the rise 'End Stage Renal Failure’ as also indicated to be affecting people the policy makers care a significant amount for because they are :”MATCHING without CONSENT and while Alive disclosing for other things.
 - I don't think it wise to give up a kidney and I'm sorry but Government polices like Water Fluoridation and Azo dyes in pills and LiOH for “Behaviors”
 - Are very much undeniably why they need more kidney's but also why sacrificing one might be way worse than you imagine.
-

- Page 54-55.) Yearly “wellness” visit

1. **Dictator's Mandate: No more considering the Financial management a symbol of “Cognitive Impairment” That is too easily dictated by the DHHS and false law-enforcement like DEA (4th,18th,21st)its too much to handle being under the Rebels**
 1. **Substance abuse risk is not going to be considered unless the physiology of the patient is negatively impacted and measurably so and not explained by situation, For example the historical use of Medicare (ever since involuntarily enrolled they have kidnapped me to rob it. As in I should have the right to petition for redress of the grievance that I only can survive the artificially generated threats and situational hazards by using more than I would. Truthfully this is a horrible reality. I literally Die if I don't Succeed.**

- **Page 55.) What's not covered by part A and Part B?**
 - **Dictator's mandate:**
 - **Eye exams need coverage if no other insurance is going to do so. If conflicts of interest are overwhelming simply mail all policy-holders the eye-exam paper (the different sized letters in rows) used in the basic test and instructions.**
 - This is no-where near as good as a professional test but clear and usable eyesight is not optional to have and should not mandate an implant of a device that violates the right to be secure in our persons; not to mention could be used as a Trojan horse if in reality is the potentially not classified technically but not openly discussed ocular implant camera that uses biological systems to power and transmit the data. If you make a person into that kind of Spy it is not optional to get their consent and explain to them that the data transmitted is in the encryption of biological frequencies that can be more easily hacked than traditional electronics (has to at some level be resonate to neuronal cells with strict filters etc). Meaning you are not able to expect privacy in any way from anyone.
 - **Dictator's mandate: Only Current proven Test for Mental Illness And Only Version That is Currently Permitted for Coverage by this policy: One Hearing Aid Per Policy Holder: To disprove the “hearing of Voices that are not real” as if the volume of the voices is different between the natural ear and the hearing aid ear: then they are real even if not decipherable**
 - If advanced enough to have an adjustment option for frequencies not normally noticed can serve a real value not just the: “bullshit required to disprove the Quacks”
 - We the Real Scientists do not understand how it is possible that we might be the first to consider such obvious methods: Really
 - Concern is obvious though: I once gave a hearing aid to a man who was being told he has schizophrenia b/c of “hearing voices” and told him that if the voices were louder in the ear with the hearing aid then he is hearing something real and therefore not insane like everyone else was telling him he was and threatening He his life with psychiatric inpatient hospitalization.
 - He realized that he was actually hearing the neighbors through the walls and that his ears are not equal in hearing (so difficult to distinguish low volumes can get garbled making real sounds indecipherable only sounding like some form of demonic “speaking in tongues type of thing.”)
 - Now the problem: he got a little over-excited about this_I get it being proven sane even to yourself (he really believed the accusations against him that are punishable by the psychiatric religion with things that do lead to death such as Anti-psychotics that beyond that have ZERO potential to treat that cause!
 - You see I could not even risk suggesting such a test to a psychiatric institution because it relies on the patient being unable to deny the results of the test=no ability to deceive and abuse.

Have a very large allocated dollar value

cause harm, and/or are inappropriate for the scenario.**

- **Self-Protection Liability Insurance such as from the USCCA**
- **This covers lawyer fees and legal expenses such as cash bail and even temporary housing so as to prepare for trial, which if you did the training and are “Well-Regulated” should be as close to guaranteed to be ruled in your favor as possible.**
 - Will include gifts for completion of training courses offered
 - Requiring negotiation we might be able to
- **Public Relations and Press Recruitment/mercenary account and/or insurance** (probably shouldn't rely upon the stock market for everything)
 - Team at home who is having been reported to by the Militiaman insured therefore having facts and evidence of the situational hazards and legal remedies (if they exist)
 - Website that is updated regularly with reports of captured and/or in distress etc (The Go-To)
 - Could include logistical information if appropriate (OK I get it if these are turned down and that won't disqualify you from the policy and missions which are voluntary in a sense of you can say no and not do it,
 - You will then get some other set of missions to choose from, If you don't pay the sweat equity price we really won't be able to insure you
 - might have an option for a premium but honestly someone who is trained and knowing that you will immediately have his back upon freedom is the main protection from murder and kidnappers and 1st amendment retaliations and the list goes on: money will never stop someone from stealing the money at gunpoint.

1. Coverage added in response to Petition Received:

This is justified as the True Mental Health Coverage Part of Healthcare

- Fees for adoption or purchase of a minimum of 2 pets, that if the same species (recommended/ requires prior authorization to cover a combination of types) are also the same gender (I do consider it a cruelty to think they can be happy if you leave them alone for even the standard 8hr work day)_and do note: the people needing these additional coverage are not expected to have the choice of working as little as an 8hr day and is unlikely to be from a standard paid employment that those overtime hours are coming from. I have done a more than 24hr day (honestly it gets like that when conscripted by morality and time-dependent= I know every minute I take is a minute people are being murdered by medicare policies) in order to attempt this specific example of work.
 - A stipend to pay for supplies such that you need not compromise on morals by feeding them the poisoned Azo dye brands etc. I was tempted to limit this one but instead I will add a
 - **“Corruption Coercion Condition”** If you are on Food-Share you can apply for this benefit by sending a scanned copy of the card/number and PIN for use along with the needed cash value requested per month (it really is too variable to make a standard stipend)_
 - We will send a Credit card that is Secured by your Food-Share (used for foreign aid missions so the Gov can go ahead and charge me I will counter-sue to the full extent of morality if that occurs more than once per administration we may react more than) and will count towards your credit score and you are guaranteed to be approved for and carries no interest as your food card will be charged in real time as you use the credit card.
 - Can make a payment account if you want to use after temporary issue is resolved and therefore increase your credit score faster. There will be an initial limit of a maximum of 50% of the value of your food dollars that month as is the prevailing market rate and no this card will not be having credit line increases or anything that obligates us to charge interest and late fees etc bullshit that I just don't want to deal with: that is for the Illuminati.
 - Be honest, accurate and if possible “Precise” about the cause of Poverty, the level that requires this benefit for most pets is extreme and indicates something beyond your control and needing assistance other than/ in addition to just the payment of pet supplies.
 - The application form includes a portion that is an Affidavit that you are under coercion to violate the Food share rules against selling/transferring the food-share due to poverty_ write-in other but we are not obligated to accept the case=* we may be mercenaries*
 - And therefore Unable to: **“Enjoy the benefits of the Food-Share Government Benefit Program”** to sign both in writing and a fingerprint in blood (only mail the scanned copy or submit by internet/picture you keep original is having an obvious symbolic meaning=we will stand up for you but know who you asking for help and what might be required)
 - **This will NOT include any form of compensation or payment for cruelty and the use of certain procedures and surgeries will void your Personal Coverage**
 - Not gonna pay for spaying or neutering (OK I am tempted to rain fury and hellfire down in this provision so recognize who)
 - I really truly do personally know that Cats and Dogs are **Persons** under the **Constitution** so don't even consider arguing with me on this provision.
 - **No exceptions** for Cultural Arguments such as Chinese practices of eating cats.
- If you even apply for the coverage of declawing: a team will be assigned to hunt you down and have you charged with and convicted for gross animal cruelty and your picture will be publicly posted with the crime charged. (know now the cost of petitioning me at this time for the standard corruption of governments in adding to bills personal agendas.) We might do worse, I don't know if you understood WHO you petitioned for this provision
- The use of this benefit obligates us to provide **minimum rental insurance** that only covers damages done directly by the pets (not for example a reaction of violent destruction of property like trying to break down my door as the likely hired to distract me Son-of -a bitch neighbor recently did_for real that type of behavior is characteristic of DHHS and DEA agents when they throw temper tantrums which always happens when someone says: 4th/18th/21st)

- This promise of animal companions is acceptable to me.
 - We will setup a hot-line and mailing address for the submission as evidence ex.)leases that include the requirement to commit acts of cruelty against animals such as declawing and spaying/neutering
 - Prosecute VERY PUBLICLY and convict those landlords and property owners: (No: hiring a property manager does not give immunity, we will not consider any defenses that don't recognize the rights of Persons to at a minimum: Cats and Dogs= This is a cost to Conscription.
 - This is the part of many Milwaukee leases that really almost made me choose to live on the street which would likely have meant losing them anyways when they got lost after I was forced to for example leave them outside to go into a store as the only available place to get food for them.
 - You would not be receiving this document at all if I didn't find housing that let me keep my Persons under my care alive and unmaimed. So do understand that.
- In General if you need help and are not getting it from the Government even after proving need: it is indicative of being a target of that government for suppression and/or worse.
 - Remember this is a Revision of Medicare Coverage (A Government Entity that I can only expect to share some not all of my values and those commonalities are not going to be consistent)
 - It obviously relies on partnership with Private Companies etc to provide the additional coverage especially the ones that require a signature in blood to apply for= obvious reasons.

- Page 56.) Paying for Long-Term Care: Not normally Covered by Medicare Meaning they intend for this to be the realm of Social Security Retirement Benefits. The reality is that eventually the cost of care exceeds the Social Security Payments and it is then the too much a real problem of the Elderly get robbed of all their possessions and chance to recover (it might be temporary illnesses for many) and put into a Nursing home which typically decides to kill them by overdose roughly 13 months on average after admission.

Not Sure if The Following is Acceptable and/or if it
is a form of Constitutionally Banned “Indentured Servitude”

Operation: **Grey Garrison Guards**

OK there is an obvious issue relating to the Operation: “Poppy Power People:” That is that I doubt any of them at all speak fluent English or could pass the Citizenship Civil Exam. The Citizenship to be granted them is not negotiable; however I do recognize the reason to require the ability to Speak English if residing in an English speaking country: truthfully I don't suspect any to neglect to learn English would do well in anything here not only regarding aspects of civil duty.

The Elderly in our country are truthfully not treated very well in many cases. This is largely because we don't as their descendants it as our responsibility; or they really shafted us (Ch.51 is really not forgivable and you shouldn't trust us to take care of people who signed those petitions)

It is obvious why the poppy farmers are ideal for this task. Pharmaceutical companies cannot be assassins who couple poisons to the pills. They can still get opioids but won't have no-one to turn to when the **election season** comes and **their pills turn red and blue instead of white**. Yeah is a direct insult those Azo dyes they use to die the Republic.

OK the people brought here from places like Afghanistan are very unlikely to feel at all safe if they don't get a function to perform. Some of them can grow poppies as is not going to be acceptable to deny them the right to do so: 4th/18th/21st We have no more alliance with Eurasia or East Asia so Oceania needs the Outer Party Lies No More.

Should pair with still cognitively capable for enough (is not defined only need the ability to teach English before any form of repayment of debt in care could be expected) **years to come elderly who will get the duty to teach them**
Proficiently in English and Constitution/ civil real history based. The recording of their lives and stories can then be the duty of the people we rescue and **assuming a real bond is formed might also solve the long-term care issue:** People can still recount their lives in the state considered “Their Time” by what I know is called “Death-care” by the employees whose ties to the elder are non-existent.

The Greatest Generation types might actually prefer it if you draft them for this into real military-active duty (not militia as we are conscripted) classification for this task and take it seriously. The stipend=chance and they can really be able to serve their Country this way.

Page 60.) Give previously Opted-Out Providers a Chance to read and understand the new Version and then if they will accept the payment terms.

I don't like the word assignment for this because it implies a very different meaning than: "Accepting the medicare approved amount for as the entire cost to be billed."

It implies that for example my doctors are assigned a specific task/tasks coupled with the payment for a service that is not disclosed to the patient at all and it is obvious that the Psychiatric Inpatient Facilities have Social Engineering Agendas that result in death of the patient. Those places get such an inexcusably high payment from medicare: Really they don't deserve to be paid at all and I'm only really able to sentence them to the noose after what I have been through.

Tuskegee Treasons: Was that enforced through the "Assignment" meaning no payment for treating syphilis is the order used to result in the outcome recorded? Probably coupled to a very high payment for some form of Bullshit like that which is being pulled out of this horrific Confession of Treason that is the Medicare Handbook 2023? They didn't tell us the mechanism in History classes or any records I remember reading.

- Page 62.) Refers to Dental Benefits:
- Dictator's Mandate: They share too many practices with the "Quacks" to cover as they are.
 - The Coverage of Ceramic or Gold fillings should be included. Mercury amalgam fillings leak when around emf fields and it tastes like shit and you can feel the retardation it causes at the time: and know that both the cause and effect are banned speech by order of the Psychiatric Cartel and Enforced by Violence.
 - We have an undeniable need for dental hygiene but is not ok to couple to this if people believe them. Like the other issue is they think that the Government will retaliate for not drinking tap water and using fluoridated toothpaste.
 - Not until the Dentists admit that Fluoridated Tap Water is never for a beneficial purpose and teach their patients the facts like:
 - How too much fluoride exposure causes dental fluorosis (Is yellow teeth dude like for real the issue of too much to revise to get usefulness because the DHHS/DEA etc Rebel Alliance has really done a number on everything it could to make us too weak)
 - Brittle/Weak Bones
 - The horrifying calcification of the Pineal gland such that when you sleep your spinal fluid can't flush your brain of toxic build-up and therefore: Kinda Obvious huh? Age-related cognitive decline. Not Age Caused.
- **To Keep It Simple Because This is Stupid:**
 - Fluoridated teeth become Harder not Stronger but easier to chip. At best they become more "Load-Bearing" which might matter for the dental procedures to restore function after teeth go missing or chipped/broken.

It is not Acceptable for fucking food-share to refuse coverage for not caving to Government Coercions like giving my enemies my address! That is exactly how the French Justified the guillotine. Like exactly.

I am being denied food-share again (12-8-2022) after being forced to submit way too lengthy an explanation and getting a mere \$50 and a broken promise for back-pay on the 7th. The fact is Government Benefits have in common that the Cost to Apply and Continue to Receive is SIGNIFICANTLY greater than the benefits received if even managed to complete their demands and get through the Damned Inquisitors of the DHHS/DEA religion. For real no more Inquisition! The DHHS and DEA are horrible. Having no food means I have almost no ability to comply with other health needs like sleep if I am going to complete the : “Don't let Medicare Murder us all Task” because it will not matter if all I can do is be hungry. I HATE DHHS AND DEA WITH EVERY FIBER OF MY BEING NOW!

Page 70.) Special Needs Plan (SNP)

Dictator's Mandate: You cannot make it required to remain too poor to survive as a stipulation of getting a beneficial healthcare plan. For example if you give me what I have written as a D-SNP I will never ever be able to get past the poverty requirement. The DEA and DHHS if allowed to continue their treason will simply Murder us in the same ways they always do as soon as we make something of ourselves. I really have already said too much to ever expect to survive their Retaliations that ALWAYS HAPPEN.

So how about a SNP category of Citizen? Maybe Citizen and Persons because the people brought here etc.

Actually yes that is it: Citizen a special needs category that means a real duty to be competent and for example vote but might be as ridiculous as petitioning and more so the basic survival stuff should be not always compromised by the Enemies of the state: DEA and DHHS.

Page 73.) Cost Plans

This seems to be intended to be vague. It looks like an attempt to solve the forced substances problem or to make it impossible to escape from IDK

The issue that the Government refuses to accept that involuntarily committing for treatment and obviously meaning to be murdered or worse is not something can be only handled through a paperwork hell. For Real: Fire-Arms For All ! That is my if you force me to run for office: Campaign Promise

Page 74.) Program of All-inclusive Care for the Elderly (PACE)

Dictator's Mandate: NO ANTIPSYCHOTICS or anything similarly for making people docile regardless of how big a Temper Tantrum the DHHS and DEA make; because they really are the need opioid painkiller group.

IDK maybe this is coupled to the Operation Grey Garrison Guard thing

Page 74.) Medicare Innovation Projects

So I assume that you will not use this adaption in anywhere near enough percentage to end the Rebellion of the DHHS/DEA/Taliban Alliance. And my time is very limited on this Earth because I have already made it impossible to consider that those murders and slavers have not already made a detailed plan to make an example of me or otherwise be able to survive or be able to do anything I want to do.

And I don't know if this is what is murdering me or saving me or both.

I don't understand how to interpret this with so vague a meaning other than: at some point was or am in that reality & I can potentially not be aware of the conditions I'm under at any given time or really if I have made any difference because a reality can be crafted for you in a local area.

Is not OK to pretend the DEA and DHHS allow dissent. We kinda have no hope to co-exist.
