WINTER

By appointment only

Spring greetings to all!

As we transition from winter into spring, we are reminded of God's goodness, as we watch dormant, sleeping trees transition into a living, growing thing. As you page through this catalog you will see new items sprinkled throughout. Several new varieties of Tree Hydrangea and Tree Lilac might catch your eye. For the most part we are well stocked, with the exception of Peaches in the fruit department. Keep in mind you can always pre-order fruit trees for 2026 with the option of taking them bare-root.

We saw some weather-related issues in 2024 with us having periods of hot, dry weather. When buying new stock water well at planting, then back off. Sandy, well drained soil water once, maybe twice a week. Heavy, clay soil usually doesn't need that much. It's very easy to overwater, especially evergreens.

If you should need help filling your beds, but don't know where to start, we would be happy to give you guidance. Everyone has different tastes, so we usually offer several options. Keep in mind we also do planting, plus delivery is available.

Thank you for letting us serve you. We have felt and seen your support the past few years. Going forward we would be happy to assist you with any needs you might have.

Regards,

*Troyer Tree Farm
Michael + Susan. Rosa. Marcus. and Michael Jr.*
