Overview

As a private company registered in Australia, CCCI realises the need to protect our 'Precious Commodity' and the 'Future of Australia' being our children. The Child Care and Early Learning Industry is part of the Lifestyle Education and an integral part of a child's first five (5) years. As a parent's responsibilities are managed and directed by the need to ensure a standard of living is enjoyed by all family members, the need for parents to have 'Peace of Mind' with the system providing their children with safe, sheltered education is imperative.

We understand that authority resources are strained and the technology age has brought us many aspects of positivity, yet has made many aspects of our daily routine, 'Fast Pace', and so the subject industry needs to support this way of life with the appropriate changes. These changes and procedure implementation will ensure the well-being of our children and the fulfillment of parental obligations. A safe secure workplace is also initiated via these procedures, as needed, to accommodate the many variables that society may introduce. Security has changed to support these variables and the constant technology upgrades, also providing the opportunity for criminals to upgrade their resources.

CCCI understands that a unified professional approach is needed to ensure that the proficiencies become commonplace for the safe, secure well-being of our children and the positive mental health of all parents. Furthermore, the stability and reputation of a much needed industry, needs to have a support mechanism to ensure the facility operators and staff can continue.

Therefore, CCCI has strategically partnered with Commercial Agent Companies and Private Investigations Teams to offer industry accreditation to Child Care Facilities and Early Learning Education Centres, via, but not limited to,

- * Accreditation/Certification of the facility after a formalised application investigation
- * Background checks on staff and contractors
- * Ongoing support options available for the facility
- * Investigation and mental health support for the clients
- * Investigation certification for the staff and contractors
- * Facility certification signage and a 1300 national 24/7 support line

IMPORTANT NOTICE

Dear Facility Operators,

As you would be aware, there has been some negative press in relation to the Child Care Industry recently that may/may not affect your business. Also, our Strategic Investigations Partners have noticed an increase in enquiries concerning Investigating Child Care Operators. Staff and/or Parents.

For these reasons and the need to instill confidence and peace of mind to all stakeholders for the financial viability of the Child Care Operations we have developed a National Accreditation Program. Please note, This is not a Compulsory and/or Mandatory Compliance option. We are a private company working with Strategic Investigations Agents to assist the operations within the Child Care sector for the benefit of all stakeholders and the financial viability of the industry.

If you would like to discuss the Accreditation process further, then please first contact our administration office via email with your contact details, and a Liaison Officer will be appointed to contact you.

Regards

CCCI
