To Whom It May Concern:

I have known and worked with Paul for over thirty years. When Michelle opened Qual-Air in 2005 it was natural that Engineered Mechanical Group, Inc. have their Company provide services for us.

Quite simply, they afford us with solid pricing, value engineering if needed, and their performance is of the highest quality. They are on the job when they say they will be and with the necessary manpower. Whenever we have had conflicts with other trades on site their Project Management team is there to provide answers. They are detail oriented and most importantly they are there at the final stages of the project to ensure a timely completion.

I highly recommend them as an HVAC/Mechanical contractor.

Sincerely,
Engineered Mechanical Group, Inc.
