THE GUY BEHIND THE LENS

Im a South MS photographer / Videographer, who specializes in doing more than just capturing photographs and videos of your most important life moments.

My creative process is focused on your needs and wishes. I want to know the story behind why you are celebrating this incredible life moment, and what it really means to you. That is part of your story, and I truly feel that it is important to understand your unique story, so I can take pictures and videos that highlight it.

When it comes to photography, I take a photo journalistic and candid approach to create timeless pictures. My video style is like a seamless storytelling experience. By blending artistic styles, I'm not only shooting your celebration through a lens, but also capturing a memorable story for you. This ensures you get the best visual possible, and will have pictures and videos you will want to look back on over and over again.

I really look forward to meeting you, hearing about your special occasion, and how I can help you capture your amazing story!
