John Posthuma (breeder) agrees to sell one **Wirehaired Pointing Griffon**,
STONYRIDGE _____ (sex) _____
Whelped _____, for \$ _____ to _____ (buyer).

1. This dog and litter will be registered with **NAVHDA**. The dog's registration number is **GR - _____**. The registration packet will include a proper Pedigree or Title Transfer.
2. The pup is healthy at time of delivery. Vaccination, microchip records, deworming schedule, and a food sample will be made available. If the buyer has any health concerns with the pup within 72 hours of arrival at home, a vet check is encouraged. If the pup is unhealthy at that time through no fault of the buyer the breeder will refund the cost of the pup upon its return.
3. The pup has been bred to be free of genetic defects. If a genetic defect occurs prior to 26 months of age which inhibits the dog from hunting and basically having a normal life, one of the following options will apply by agreement of the breeder and buyer:
 - a. Refund of up to one-half of the purchase price, provided the buyer agrees to spay/neuter and care for the dog appropriately.
 - b. Replacement of the dog upon its return provided we have a suitable pup available.
4. The pup has been properly socialized and demonstrates no temperament problems at this time. The breeder cannot be responsible for future handling, development, or social behavior.
5. Along with the Registration material the buyer will receive a copy of "**The Care and Training of the Versatile Hunting Dog**" to assist in the training and handling of their Pup. We strongly encourage contact with a local NAVHDA chapter and training sessions.
6. The buyer agrees to have the pup evaluated in a **NAVHDA Natural Ability** test before 16 months of age. A copy of the **NAVHDA Aims Programs and Test Rules** will be included to assist in training and testing.
7. The buyer agrees to have the dog evaluated for hip dysplasia by x-ray, by **PennHipp** criteria after 10 months of age, or by **OFA** after 24 months of age.

A deposit of \$ _____ paid _____ with balance due of \$ _____ paid _____
