

Analysis of protein microarrays with the

Software
Interpretation, evaluation and archiving of ViraChip® tests

- Central interface for the entire processor and camera communication
- Automatic evaluation of up to 96 ViraChip® test results within seconds
- Standardised microarray analysis and interpretation with individually adjustable printout
- Bi-directional connection to laboratory information systems for secure data transfer

Minimum technical requirements:

PC
 Processor: Intel Core i5
 Interface: 3x USB 2.0
 Main memory: 2 GB
 Hard disk storage unit: 500 GB

Operating system: Win7 or Win8 32 Bit version
 Scanner: CLAIR (Co. Sensovation)

CE Order information
 ViraChip® Software:

Product no. V-VCNUPR
