

LITHIUM-ION BATTERY

8 YEARS

LIMITED WARRANTY

8-YEAR LIMITED WARRANTY

BREEZY EV (“the Manufacturer”) warrants each BREEZY-branded Lithium Iron Phosphate (LiFePO4) battery (“the Battery”) sold by BREEZY EV or any of its authorized distributors or dealers to be free from defects for a period of eight (8) years (“the Warranty Period”) from the date of sale, as determined by the customer’s sales receipt, shipping invoice, and/or battery serial number, together with proof of purchase. The first two (2) years provide full replacement coverage, and the remaining six (6) years provide pro-rata coverage.

Within the Warranty Period, and subject to the exclusions listed below, the Manufacturer will credit, replace, or repair the Battery and/or its components if the components in question are determined by the Manufacturer to be defective in materials or workmanship. If the Manufacturer determines that the components are repairable, the Battery will be repaired and returned. If the Manufacturer determines that the components are not repairable, a new, similar Battery will be offered. The offer will be valid for a period of thirty (30) days from the date of notification.

The warranty period for any repaired BREEZY lithium battery product or its replacement shall be limited to the remaining term of the original Limited Warranty Period.

This Limited Warranty does not cover labor costs associated with the installation, removal, repair, replacement, or reinstallation of the lithium battery pack or any of its components.

NON-TRANSFERABLE

This Limited Warranty applies only to the original purchaser of the Battery and is not transferable to any other person or entity. Please contact the authorized dealer or place of purchase regarding any warranty claim.

COVERAGE UNDER THIS LIMITED WARRANTY MAY BE EXCLUDED OR LIMITED AT THE SOLE DISCRETION OF THE MANUFACTURER FOR REASONS INCLUDING, BUT NOT LIMITED TO, THE FOLLOWING:

- Shows indications that it has been altered or modified in any way from its original specifications, including, but not limited to, alterations to the lithium-ion battery pack, battery management system, or electrical system;
- Shows indications that the failure was caused by installer error, such as reverse polarity, misuse of system-wide equipment, or inaccurate programming of any ancillary equipment connected to the lithium battery pack;
- Shows indications that the battery charger has been modified to charge a lithium battery that is not approved for use with the charger;
- Shows indications that the battery pack was disassembled, opened, or tampered with in any way before written authorization was obtained from the Manufacturer;
- Shows indications that attempts may have been made to intentionally reduce the life of the battery pack;
- Contains lithium battery packs that are not paired with the battery management system originally provided by the Manufacturer;
- Shows indications of an extended period of idle storage without recharging, repairs performed by an unauthorized person, or unauthorized modifications;
- Shows damage resulting from an accident, collision, neglect, or abuse of the battery pack system;
- Shows environmental damage caused by inappropriate storage conditions; exposure to extreme heat, extreme cold, fire, freezing conditions, or water;
- Shows damage resulting from improper installation, including loose terminal connections, undersized cabling, incorrect series or parallel connections for the required voltage and Ah rating, or reverse-polarity connections;
- Shows that the Battery was used for applications other than those for which it was designed and intended, including repeated engine starting or continuously drawing more amperage than the Battery is rated to discharge under its specifications.

- Shows that the Battery was used with an oversized inverter/charger rated at 10 kW or greater without a Manufacturer-approved current surge-limiting device;
- Shows that the Battery was undersized for the application, including use with an air conditioner or similar device with a locked-rotor startup current, without a Manufacturer-approved surge-limiting device;
- Shows that the Battery was not charged for more than one (1) year. Batteries must be charged regularly to maintain a long service life;
- Shows that the Battery was not stored in accordance with the Manufacturer's storage guidelines, including storage at a low state of charge. The Battery must be fully charged before storage.

This Limited Warranty does not cover a Product that has reached its normal end of life due to usage, which may occur before the expiration of the Warranty Period. A Battery can deliver only a fixed amount of energy over its lifetime, and the length of that lifetime will vary depending on the application. The Manufacturer reserves the right to deny a warranty claim if, upon inspection, the Product is determined to have reached its normal end of life, even if it is still within the Warranty Period.

WARRANTY DISCLAIMER

This warranty is provided in lieu of all other express warranties. The Manufacturer shall not be liable for any consequential or incidental damages. The Manufacturer makes no warranty other than this Limited Warranty and expressly excludes any implied warranties. This Limited Warranty is non-transferable.

LEGAL RIGHTS

Some countries and/or states do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damages; therefore, the above limitations may not apply to you. This warranty gives you specific legal rights, which may vary by jurisdiction. This warranty shall be governed by and interpreted in accordance with applicable law. This warranty constitutes the entire agreement between the parties relating to the subject matter herein. No employee or representative of the Manufacturer is authorized to provide any warranty in addition to those contained in this agreement.

NON-BREEZY LITHIUM WARRANTIES

This Limited Warranty does not cover any Battery sold by the Manufacturer or any authorized distributor or dealer to an Original Equipment Manufacturer ("OEM"). Please contact the OEM directly regarding any warranty claim for such Battery.

NON-WARRANTY REPAIRS

After the expiration of the Warranty Period, or for damage not covered under this Limited Warranty, customers may still contact the Manufacturer for battery repairs. Costs will include shipping, parts, and labor charged in accordance with the Manufacturer's current labor rate schedule.

SUBMITTING A WARRANTY CLAIM

To submit a warranty claim, please contact the original place of purchase. The Battery may be required to be returned to the Manufacturer for further inspection.
