GDPR Compliance

The GDPR has arrived, and Horizon Technologys is here to Help

On May 25, 2018, a new landmark privacy law called the General Data Protection Regulation (GDPR) takes effect in the European Union (EU). The GDPR expands the privacy rights granted to EU individuals, and it places many new obligations on organizations that market to, track or handle EU personal data, no matter where an organization is located. Horizon Technologys is here to help our customers in their efforts to comply with the GDPR through our robust privacy and security protections.

What Horizon Technologys is Doing About GPDR

Horizon Technologys welcomes the GDPR as an important step forward in streamlining data protection requirements across the EU and as an opportunity for us to deepen our commitment to data protection. Similar to existing legal requirements, compliance with the GDPR requires a partnership between Horizon Technologys and our customers in their use of our services. We will comply with the GDPR in the delivery of our service to our customers. We are also dedicated to helping our customers comply with the GDPR. We have closely analyzed the requirements of the GDPR and are working to make enhancements to our products, contracts, and documentation to help support Horizon's and our customers' compliance with the GDPR.
