

Environmentally friendly protective coatings specifically for long-term asset protection for owners.

WiserShield 61™ is a waterborne modified elastomeric coating formulated both as a single part emulsion or a two-component fast setting product. When fully solidified, the coating provides a high-quality membrane delivering superior protection against water and chemical intrusion.

BASIC USES:

- Poured Concrete Below Grade
- Built Up Roofing* and Rooftop Gardens
- Concrete Slabs Membrane
- Parking Decks
- Unexposed Tank and Pond Lining
- Insulated Concrete Form Waterproofing Below Grade
- Corrosion Protection

*with approved overcoating

Vapor Lock™

Vapor Lock™ 20/20

Water Vapor Reducing Admixture

is a ready to use concrete admixture that has an inorganic chemical reaction with components of the cement and utilizes the Free Water to eliminate the route of water ingress/egress.

Vapor Lock™ 40/40 Corrosion Inhibiting & Waterproofing Concrete Admixture

is a ready to use concrete admixture that uses proprietary technologies that act as a powerful corrosion inhibitor while water and vapor proofing concrete. This corrosion resistant protection reaction is a permanent self-healing Nano technology and integral component of the finished concrete.

All Vapor Lock™ admixtures provide a permanent cure for moisture vapor emission and are **VOC free!**

MG-KRETE™

BY:

MG-KRETE™ is a cost effective, magnesium polyphosphate-based system that not only repairs damaged concrete but restores the structural integrity back into the repaired structure.

Once installed **MG-KRETE™** provides a considerably stronger non-porous surface to concrete that is more durable and resilient to environmental conditions, oils, gasoline, salts and UV radiation.

MG-KRETE™ is ideal for a virtually unlimited range of concrete repairs including thin overlays, pouring into forms, staircases or as a fast-set plug. In addition, **MG-KRETE™** can be troweled vertically and overhead, and cures very rapidly in all weather conditions - most applications can be returned to service within 1 hour!

The cost of removing and replacing concrete is substantial and very often inconvenient.

MG-KRETE™ is the most cost effective alternative available.

QUICK, EASY & Durable!

EverStep Flooring is designed for swift installation, easy maintenance, and durable performance. In hospitality settings or commercial settings, there is no room for downtime. **EverStep Flooring** products install quickly and perform beautifully.

LVT is more expensive than broadloom carpet. However, the lifespan and ease of maintenance make it an investment that in time will repay the owner many times over. A properly specified luxury vinyl tile can present a much cleaner environment which will result in a positive overall experience.

EverStep Flooring is committed to bringing a large selection of beautifully designed, high-performance LVT options to the hospitality market. Our products have the realistic look of natural hardwood and offer unmatched durability. The perfect combination for hospitality and commercial interiors.

EverStep Flooring – Your Choice for Hospitality.
