# SUN OF MAN

THE BABIES ARE  
IN THE NAME OF

THE CHILDREN

THE GREATEST

FOR EVERY TIME  
THERE IS A BOOK!

LIGHT — Traveling at the speed of — THOUGHT

MATTHEW 18

SURAH 49: 1-10

A

FIVE

PERCENT

DIGEST

In the name of a **Man** called **ALLAH**, and **His Determined Idea** to empower the children to change the world, I greet you, the 5 Percent youth and your peers with an obnoxiously loving “**PEACE!!!**”

As always, to those that taught us of HE who's worthy of all praise now and forever, thank you for spreading the love of God across time and space to us whom were not there.

We hope this Children's Day 2022 issue of the Sun of Man finds you and your loved ones in the best of health and that you are enjoying your childhood this post pandemic summer.

### **THE BABIES ARE THE GREATEST!**

My dear young brothers and sisters, these are unprecedented times we're living in. COVID-19 has drastically changed the landscape of our lives. We are so proud of the way you continue to adapt to schooling and living in this day and time. Going back and forth from remote learning to in-person schooling was not an easy task, and it definitely shows how dedicated you are.

We would like to inspire you all to aspire for greatness and make lofty goals for yourselves, while at the same time, keeping in mind that all things go from 1-Knowledge to 9-Born. To start something new is always intimidating, but taking that first step and staying consistent is the key. Slow and steady wins the race because life is a marathon not a sprint. Have you ever read the story of the tortoise and the hare?

### **UNITE THE SEEDS!**

The importance of uniting the seeds (black, brown, yellow and white) to build together in supreme equality cannot be overstressed. A lot of people, young and old, play the blame game with society's problems. And it's either the government, their teachers, their parents, the devil, and whomever else except themselves, that creates problems for them. You mustn't wait for anyone or anything outside of your own selves to bring change to your lives, your loved one's lives, and society at large. You must use education and training to prepare yourselves to lead and organize your own movements for change along with your peers. It's up to you to make sure that today's problems do not carry on to the next generation. You have the power to come up with real, tangible ideas that can make a difference.

In the 1968 Otisville interview Allah stated:

*“Unite. Let your children and them unite together and create new ideas. Where the world is building a square, now it's going to be building a circle. And they don't need your ideas no more. Your ideas did what you were supposed to do. All you got to give them is the basics, because they'll do it them..., what? Selves! See, you can see where ideas have traveled for many years 'cause when you people first came to this country there were no houses. It went from the log cabins to this. So, each generation brought this about, right? So, let the children bring about another new world.”*

We, Allah's Five Percent, are committed to encouraging young people like yourselves by celebrating your accomplishments and supporting the development of your education and career. Our universal parliaments are an open forum for those of you who prepare yourselves to invite your peers and community members to share your ideas.

Humbly in your service,  
MAHDI

In the name of Allah and His 5%, who came to deliver us from HELL in order to guide us in the RIGHT direction, I greet you all with the word of PEACE! I am honored to share with our beautiful Nation a piece of history which is very dear to me and those who were up close and personal with our brothers who were...

### **SPIT ON BY ALLAH HIMSELF**

It was the month of July (Justice-U-Love-Why or Just-You-Lie-Why), the month which was always said to my peers and I when, "The Jews Lied and crucified Jesus Christ"—thank you Tio, Kaheen Allah, for your direct impact on us while we were being prepared for the word of God—during the Summer of 1984, on top of the mountain in Fort Greene Park, where we were required to meet early before the parliament to deal with our details of securing the mountain top and checking the perimeters of the park for anything suspicious/strange and to meet minds with our brothers of Mecca (Manhattan) and Medina (Brooklyn) and all those who kept the order of the day as it was given to us.

This was also the day I brought a piece of artwork that I completed of the Universal Flag, which I gave to Universal Shaamgaudd Allah (USA) as a gift. Of course my nerves had me trembling as I didn't know what to expect. Yet, I knew during the order of the day, it would be presented to him, I would be relieved and could stop shaking like a pair of loaded dice. On this day, so much was happening. Of course, because of it being a Medina Parliament, we had to be on point at this time due to many misleading teachings (some which still exist today) being spread throughout the NYC boroughs.

As always, the parliament started at 2pm sharp with no negotiations cause that was the law and order of Supreme Mathematics. Much was said, the order prevailed, and of course our brothers stated many amazing facts which set corrections throughout the crowd of Gods and Earths, much of which was either accepted or rejected no matter what the truth was that was manifested. Those who got it, got it and those who didn't, well let's say most are not with us today and neither are their fruits and seeds. Once the coast was clear and all those who were with us united as one, we checked each other's minds on the topics discussed, the day's Mathematics, and the day's degree which was manifested on the mountain top. I was, then, pulled to the side by my brothers, Virtuous and the Twins, lysee and AllDivine (PBUH), walked me over to USA and said this is our brother, Divinejustice, who wanted to give you something.

### **HE LOOKED AT ME AND SMILED!**

It felt like I was gunna faint. LOL! Yet I held myself together and He asked, "What is this young man?" All I could do is pull the picture board out of the bag and hand it to Him. He looked at it and didn't make any

expression. He walked over to a few other brothers, then came back to where we were standing and said to the oldest of us, "You see this, he made this for me!" And He smiled. What came next, I wasn't expecting to get, yet it would stay with me for a life time. The Flag I drew was finished with gold, black, and silver glitter, with the Moon above the 7, a Black man wearing a crown and a Black woman wearing a head-wrap and a Black infant. He smiled again as He looked at us and said, "This is why we have to keep teaching it how it was given or else they will plant snakes amongst y'all."

He turned to me and asked me my physical degree. I had just turned 16 (Knowledge Equality) and He said, "Well, I can give it to you." He began to explain the order of the universe as it was explained to Him by Almighty God Allah. He also began to correct me on the position of the 7 being over the Moon, not the Moon over the 7. He saw that by me being in love with the art world as He was, He said,

*"I see you have Understanding cause you're an artist just like me."*

I smiled and continued on to tell me how it would take years, months and days for Him to give me a full and complete history of these things in just this conversation. He took me through all eight points of the Sun—the long and short points. He took me through the shades and told me to always know/remember that the universe is ever-expanding and that just because you only see eight points be good at multiplying!

USA handed back my picture and told me that I'm the maker and owner of that artwork and for me to take good care of it and hold it for Him. That's when He pointed in the crowd at one of our brothers, who was older than most of Us, and said give them that degree we gave you on this. We said Peace, He said thank you, smiled again and told me He was honored. As He turned and walked away, I couldn't help but CRY. LOL! It was a good cry and feeling and I can say that I survived being burned and received a blessing. This was one moment I was blessed that I didn't get burned by the Son of Allah. Later, Tio walked us aside and broke it down to us about the years, the months, and the days. We were told to keep teaching, to always celebrate one another, appreciate our brotherhood and keep a close check on our brothers so that they will not get caught up in the weeds growing tall within the grass of the devil's playgrounds. We were instructed to keep teaching and be cautious of Just-You-Lie-Why!

We were children then and we were told that there will be children who would come and change the world. Have a great Children's Day and I hope this piece of my history brought joy to your heart and mind as it did mine.

In the Name of Allah and his 5 Percent I leave you in Peace,  
Divinejustice (D'Jaa)

In the name of Allah and His right-hand man Justice C, I greet you with the most highest respect in the universe. Peace!

**THE MORE YOU KNOW, THE FURTHER YOU GO!**

As young 5%ers, we were taught the importance of education by those who were guiding us on the path of everlasting life. We were instructed to investigate everything. We spent many hours at the local public library searching through every dictionary, every set of encyclopedias, and every book that had anything to do with history of the original people, as well as scientific facts that would assist us in showing and proving the validity of the teachings of the 5% Nation.

We learned about ancient civilizations built by original people using mathematics and science. We learned that all religions, all cultures, all customs, all sciences, in fact everything on our planet and throughout our universe, was rooted in the Original Man. Our long hours of study and investigation paid off. The proof is in the pudding. Those of us that took heed to our educators have become the Gods that keep the 5% Nation alive in this day and time. We were taught to take nothing and no one on face value. Our Supreme Mathematics have always been our navigational tools that we would use to determine what something, someone, as well as someplace really was and where we placed it in our lives.

The very first key in the Supreme Mathematics is Knowledge. A characteristic of knowledge is to be aware or to know. We use our Supreme Mathematics to draw everything up—is it good? Is it bad? Does it have pork in it? Who is that? Where are they from? Are they righteous? Do they know their lessons? Doing the knowledge is how you initially determine what something, someone, and/or some place is and if you're going to interact with that person, go to that place, and/or do that thing. Doing the knowledge is extremely important. We must know in order for us to understand. Understanding allows us to see everything for what it really is.

Once you know and understand Supreme Mathematics, you'll be able to utilize these keys to answer all the questions you have and come up with the solutions to every problem. However, you must be aware of false, grafted, watered down mathematics that some have passed off as the Supreme Mathematics as revealed by almighty God Allah. For whatever reasons, people have attempted to change Allah's Supreme Mathematics. Well, those of us that have kept Allah's teachings in their original form are here to give it to you how His sons (firstborns and first-generation Gods) gave it to us. We (the fruits of the firstborns) have confidence and trust in the youth of our nation. We know that the youth can separate the doers from the talkers and the builders from the b'sers. As Dumar Wa'de Allah told us time and time again,

*"The greatest education is the knowledge of yourself."*

We, here at the Sun of Man, are dedicated to providing you with the true and original teachings of Allah and His 5% Nation.

Until the next time, I leave you the same way I came, with the most highest respect in the universe,  
Peace!  
Trueborn My Allah

**\*A WORD FROM THE WISE\***

HE WHO READS LEADS!

THE MORE YOU KNOW THE FURTHER YOU GO!

In the name of Allah, the one to whom all praise is due; the most beneficent; the most merciful, and of His Sun, Allah Intelligence, the gate keeper and protector of the truth, do I greet you in the most highest respects of the universe which is Peace!

May this important, but brief, message find you in the best of health both mentally as well as physically.

Brothers and sisters I must stress to you the importance of learning and using Mathematics.. Mathematics is used everyday in so many ways. It's something we need in order to survive and maintain our livelihood.

**EVERYTHING IN LIFE**  
**DEALS WITH MATHEMATICS**

If I gave you \$10,000 dollars at the first of the month, you'll be broke by the end of the month. Why? Because many of you would become consumers and start depleting your financial power by buying instead of supplying. Buying everything takes away from your finances. Just like the 5%, if we buy into every religion trying to sell us what's in their bag, it will deplete us of our mental power. All we need is Supreme Mathematics, Supreme Alphabets, and 120 Degrees, and we can maintain our mental power by adding on to it! In order to keep your financial power, you must add on to it.

Take that money and save some, start a business, and have some left over for a cushion or a back-up plan in case you hit a curve or a fork in the road while striving to start a business. We were taught that if you stay a consumer, you will eventually be consumed by bills of all kinds—water bills, food bills, light bills, rent, credit card bills, and cell phone bills.

Keep a good credit score by not ruining it with late payments and spending beyond your means. Soon, you will want to buy a house or a car or start a business. Good credit will be your stepping-stone for building a good relationship with a bank. Once they see you are good with math, like maintaining financial power and keeping a good record of paying people back on time, they will want to assist you in your future endeavors.

Simply put, if you can apply Mathematics properly, you will be successful in all your endeavors—one of which is to start off small (1-Knowledge) and then excel or grow in numbers as time goes on (9-Born). This is how Mathematics works. To try it any other way only sets you up for failure. So, don't be fooled or misled by society and its traps! Don't chase fast money. "Fast money" only means as fast as you get it, it will be just that fast to lose it. Be smart, be intelligent, and be wise with your money and your math, it will benefit you greatly in years to come.

PEACE!  
ALLAH INTELLIGENCE
