ORGANIZATIONAL ROAD MAP

OUR PRODUCTS WITH A WIDE RANGE OF WATER SOLUTION SYSTEMS

RO WATER FILTRATION FOR DRINKING & COOKING

HORECA

Hotels, Restaurants, and Cafés Sector.

Treated water is used in various applications to ensure safety, improve quality, and enhance customer experiences.

- **Reverse Osmosis Systems:** Many establishments use reverse osmosis (RO) systems to remove impurities from tap water, ensuring high-quality, purified water for drinking, cooking, and ice-making. This process removes contaminants such as chlorine, heavy metals, and bacteria.
- **Activated Carbon Filters:** These filters are commonly used in restaurants and cafes to remove chlorine, odors, and other organic compounds from water, improving its taste and smell, which is crucial for beverages like coffee and tea.

OUR MULTIPLE RANGE OF REVERS OSMOSIS SYSTEMS FROM COMPACT TO COMMERCIALS KITCHEN SOLUTIONS

- COMPACT RO FILTER FOR INDIVIDUALS COFFEE MACHINES, ICEMACHINES & DRINKING WATER.
- CENTRALIZED RO FILTER FOR COMPLETE KITCHEN EQUIPMENTS.

SOFTENED WATER FILTRATION FOR DRINKING & COOKING

- **Water Softeners:** Hotels and restaurants often use water softeners to treat hard water by removing minerals like calcium and magnesium. Softened water prevents limescale buildup in dishwashers, coffee machines, and boilers, prolonging their lifespan and improving their efficiency.

OUR MULTIPLE RANGE OF WATER SOFTNER SYSTEMS FROM COMPACT TO COMMERCIALS KITCHEN SOLUTIONS

- COMPACT WATER SOFTNER FOR INDIVIDUAL DISHWASHER AND ICEMACHINES.
- CENTRALIZED WATER SOFTNER FOR COMPLETE KITCHEN EQUIPMENTS, SMART REFINER HYBRID SYSTEM.

TREATED WATER FILTER FOR HOT BEVERAGES

- **Filtered Water for Coffee and Tea:** Specialty coffee shops often use high-quality water treatment systems to ensure that the water used for brewing coffee and tea is free from impurities that could alter the flavor profile. This can include a combination of RO and mineral rebalancing to achieve the ideal water composition for brewing.
- **Soda Fountain Systems:** In restaurants and cafes, water used in soda fountains is often filtered to remove impurities and ensure the consistent taste of carbonated beverages.

A WIDE RANGE OF TREATED WATER FILTER FOR HOT BEVERAGES

WATER TREATMENT FILTER FOR ICE PRODUCTION

- **Filtered Water for Coffee and Tea:** Specialty coffee shops often use high-quality water treatment systems to ensure that the water used for brewing coffee and
- **Ice Machines with Filtration Systems:** Ice used in beverages must be made from high-quality water to ensure it is clear, odorless, and tasteless. Ice machines often include filtration systems to remove chlorine, sediment, and other impurities from the water.

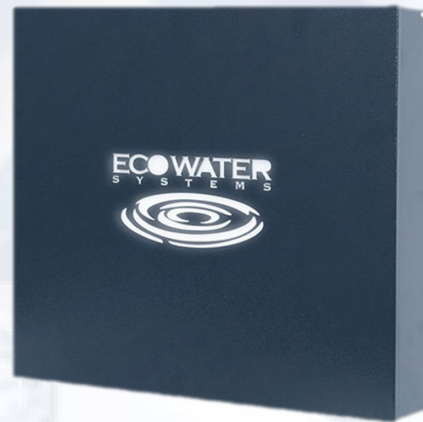

A WIDE RANGE OF TREATED WATER FILTER FOR ICE PRODUCTION

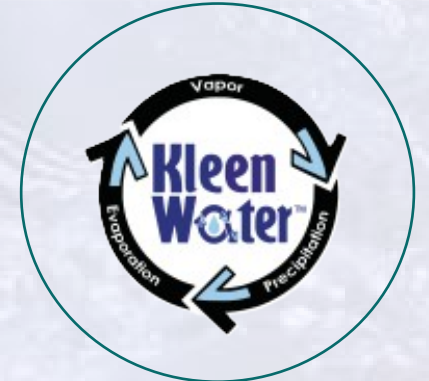

As ice is composed entirely of water, water in ice production ensures that the ice is free from chlorine odor and has clearer cubes, due to the removal of particles that might otherwise form crystals. The use of a scale inhibitor prevents scaling on the evaporator, extending the life of the equipment and reducing downtime.
