Re: Preliminary Soil Testing- Holley Road (Map R-17/Lot 7), Farmington

Dear Rick:

I performed preliminary soil testing at the above-referenced properties on November 18, 2025. The purpose of the investigation was to determine the suitability of the properties for on-site subsurface wastewater disposal.

Enclosed is a site plan illustrating the location of the test pits excavated, along with the soil profile descriptions.

The soil is suitable in the area of TP-1, TP-2, TP-2A, TP-3, TP-4, TP-5, TP-6, TP-7 and TP-8, as defined by the State of Maine Subsurface Wastewater Disposal Rules. Based on my testing and field observations, other areas suitable for septic exist on the property.

Complete subsurface wastewater disposal system designs (HHE-200 forms) are needed for permits to install the systems once building locations, building sizes, and site development are conceptualized. Please contact me if you have any questions or additional matters for discussion.

Respectfully,
