

Dropkeys Side Risers Installation Guide

Thank you for purchasing Dropkeys Side Risers from Lying Awake Creations. Dropkeys Side Risers are a simple to add on modification to the ASM Diosynth side keys for easier playability.

Warnings:

Dropkeys Side Risers contain several small parts. Keep away from children.

Do not remove the double sided tape dot backing until ready to install.

Dropkeys Side Risers are not designed to be stackable.

Do not expose Dropkeys to temperatures greater than 50°C/122°F or otherwise they may deform.

Use of Dropkeys may void the ASM Diosynth warranty. No replacement of this warranty is implied or provided.

Included with the Dropkeys Side Risers package are;

- 1) 4 Side Risers in the selected size and color with double sided tape dots
- 2) Extra set of double sided tape dots

Start by placing your Diosynth on a cushioned surface such as a pillow to protect the underside of the body while performing the installation. It is also recommended the mouthpiece cover be used.

Remove the double sided tape dot backing. Press the Side Riser (with the curved opening towards the top side of Diosynth) down onto the Diosynth side key. Repeat for all 4 side keys.

Now, you're ready to play. Enjoy.

For removing the Side Risers, use a butter knife or other non-sharp tool to gently pry away the Side Risers. Remove any residue stick tape with your fingers and damp cloth if needed.
