## High-Power Bidirectional Programmable DC Power Supply FTB9000

Model	FTB9050-80-150	FTB9060-300-75	FTB9060-500-40	FTB9060-800-25
Power	-5~5kW	-6~6kW	-6~6kW	-6~6kW
Voltage	0~80V	0~300V	0~500V	0~800V
Current	-150~150A	-75~75A	-40~40A	-25~25A
Resistance	0.02~106Ω	0.3~800Ω	0.5~2.5kΩ	1.2~6kΩ
Model	FTB9100-80-300	FTB9120-300-150	FTB9120-500-80	FTB9120-800-50
Power	-10~10kW	-12~12kW	-12~12kW	-12~12kW
Voltage	0~80V	0~300V	0~500V	0~800V
Current	-300~300A	-150~150A	-80~80A	-50~50A
Resistance	0.01~50Ω	0.15~400Ω	0.25~1.25kΩ	0.6~3kΩ
Model	FTB9150-80-450	FTB9180-300-225	FTB9180-500-120	FTB9180-800-75
Power	-15~15kW	-18~18kW	-18~18kW	-18~18kW
Voltage	0~80V	0~300V	0~500V	0~800V
Current	-450~450A	-225~225A	-120~120A	-75~75A
Resistance	0.006~35Ω	0.1~266Ω	0.16~833Ω	0.4~2kΩ
Model	FTB9300-80-900	FTB9360-300-450	FTB9360-500-240	FTB9360-800-150
Power	-30~30kW	-36~36kW	-36~36kW	-36~36kW
Voltage	0~80V	0~300V	0~500V	0~800V
Current	-900~900A	-450~450A	-240~240A	-150~150A
Resistance	0.003~17Ω	0.05~133Ω	0.08~416Ω	0.2~1kΩ
Model	FTB9450-80-1350	FTB9540-300-675	FTB9540-500-360	FTB9540-800-215
Power	-45~45kW	-54~54kW	-54~54kW	-54~54kW
Voltage	0~80V	0~300V	0~500V	0~800V
Current	-1350~1350A	-675~675A	-360~360A	-215~215A
Resistance	0.002~11Ω	0.03~88Ω	0.05~277Ω	0.1~666Ω
Model	FTB9600-80-1800	FTB9720-300-900	FTB9720-500-480	FTB9720-800-300
Power	-60~60kW	-72~72kW	-72~72kW	-72~72kW
Voltage	0~80V	0~300V	0~500V	0~800V
Current	-1800~1800A	-900~900A	-480~480A	-300~300A
Resistance	0.002~8.8Ω	0.025~66Ω	0.042~208Ω	0.1~500Ω

# Datasheet

- Single range:
  - Voltage: 0~2250V
  - Current: 0~±4500A
  - Power: 0~±180kW
- The master and slave parallel machines can extend the power up to 1.8MW;
- Voltage accuracy: 0.05%+0.05%F.S.; Current accuracy: 0.1%+0.1%F.S.;
- PF: 0.99, Overall efficiency higher than 93%; regenerative load function, high regenerative efficiency 95%;
- Two-way energy transfer, seamless switching across quadrants;
- Automatic line loss compensation;
- With constant pressure, constant current, constant power, constant resistance function;
- CV/CC Priority mode;
- Voltage/current slope can be set;
- With voltage output slow rise, slow fall function;
- It has the function of charge and discharge;
- With the function of sequence and waveform, it can realize the complex voltage and current waveform, such as automobile electronic test voltage waveform, user-defined;
- Battery simulator function (optional);
- Equipped with photovoltaic cell array simulation function (optional);
- Over voltage, over current, over power, over temperature, under voltage, power off and other comprehensive protection function;
- High pressure isolation digital, analog, monitoring, control interface;
- Equipped with a variety of communication interfaces: LAN, USB, optional RS485, CAN or GPIB;
- Communication protocols support SCPI, MODBUS, and CAN-OPEN (optional);
- Provide communication programming manual, SDK development kit and demonstration of upper computer;
- TFT color LCD screen, Chinese, English, traditional menu interface; Intelligent Fan Control;
- 3U/18kW high power density, standard 19-inch rack mounted design;
- CE certificated .

## General

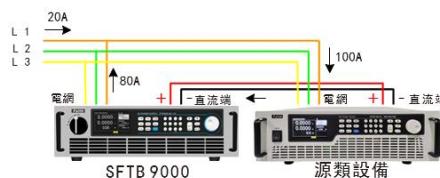

FTB9000 series products are a wide range of high power bidirectional programmable DC power supply with both DC power supply and feedback load function. It can not only realize the Source function, but also act as a feedback load to feed the absorbed energy back to the grid to realize the bidirectional flow of energy. FTB9000 series voltage range from 80V to 2250V, single current up to 4500A, single maximum power of 180kW. It can realize seamless switch between source and load quadrants, and has rich testing functions and simple human-computer interaction interface. It is widely used in high-power testing scenarios such as automotive electronics, energy storage and fuel cells.

## Application

- Energy storage converters (PCS), microgrid equipment production and development ;
- Server power supply, UPS, inverter production and development;
- Solar arrays, wind power applications;
- Fuel cell, power battery, lead battery, supercapacitor applications;
- Aerospace, railway, new energy vehicles, motor drive testing applications;
- Uav, laser, sensor applications.

## Regenerative electronic load function

FTB9000 series products have a feedback load function, which can feedback the energy of the equipment under test to the factory Intranet for direct use, rather than dissipating in the way of heat. Its energy feedback conversion efficiency is up to 95%, not only can greatly reduce the user's electricity cost, but also can avoid the use of air conditioning and other refrigeration systems, reduce noise.

**ST** STARTESTS

## Dual quadrant, wide range

FTB9000 series products have dual quadrant operation characteristics, can be used as DC power output, and can be used as a feedback load to absorb energy. At the same time, the FTB9000 has a wide operating range, with more than 3 times the wide range of output range, one power supply can cover more applications, for users to save costs.

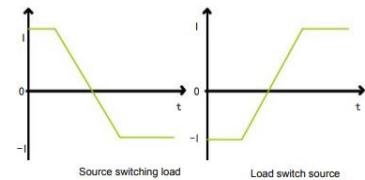

## 3U/18kW High power density

The FTB9000 series offers a high power density of 3U/18kW, featuring accurate output, fast response and low ripple noise. Wide range of voltage 80V ~ 2250V, current 25A ~ 4500A combination, suitable for every test and verification link from design to production process.

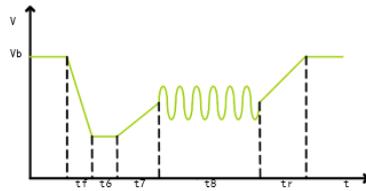

## Seamless switching of bidirectional current

When the conventional DC power supply and load switch between positive and negative currents, a short step will be generated at 0A, resulting in discontinuous current commutation. FTB9000 not only has the dual quadrant working ability, but also has the high-speed current switching ability, which can realize the seamless connection between positive and negative current switching, effectively avoid voltage or current overshooting. It is widely used in the test of motor, battery pack, BMS and energy storage system.

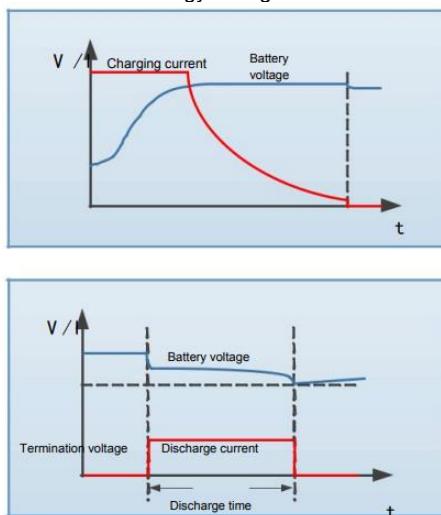

## Sequence and waveform functions

The FTB9000 provides users with sequence editing for power outages, transient drops, and other voltage and current variations. A total of 10 sequence files, each file 100 steps, support loop, link to facilitate the realization of complex waveform output.

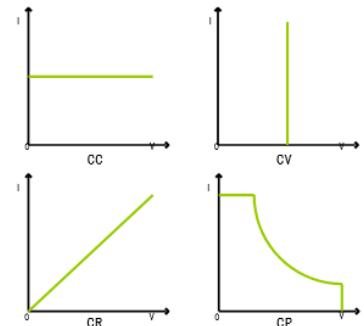

## Battery charge/discharge test

FTB9000 series has charge/discharge test function due to its unique bidirectional design, which is suitable for charge/discharge test of all kinds of batteries and energy storage devices.

## Load function

FTB9000 as a feedback load, with constant current, constant voltage, constant power, constant resistance four basic working modes, can meet a wide range of testing needs.

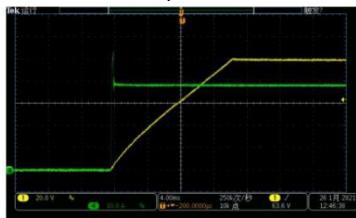

# Datasheet

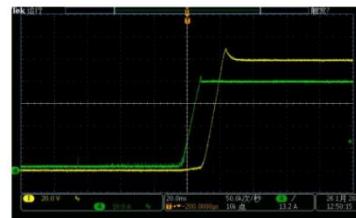

## CV、CC priority

When the power output is connected to the inductive or capacitive load, the output current or voltage will overshoot to a certain extent. In some cases, the protection of the device under test will be triggered. In serious cases, the device under test will be damaged directly. FTB9000 series has CV and CC output priority function to effectively suppress output overshoot and its impact.

CV Priority  
(high speed build up voltage, current overshoot)

CC Priority  
(high speed build up current, voltage overshoot)

## Master and slave parallel machine function

FTB9000 series power supply provides master/slave parallel mode, supporting 10 power supply of the same model for parallel operation, so that users can achieve more power expansion. In parallel operation, the host automatically merges display parameters, and the slave automatically copies the set parameters of the host to realize automatic flow sharing.

## Composite signal port (optional)

FTB9000 series can be equipped with composite signal port, which has the following functions:

- READY :Indicates the working status of power supply;
- Output mode indication;;
- Composite external control;
- Voltage and current output monitoring;
- Voltage, current and power programming control;
- Master and slave communication.

## General spec table

Items	Parameters
AC INPUT	Three-phase input, 340VAC~480VAC , frequency 47Hz~63Hz
PF	0.99(Typical values)
EFFIENCY	>93% (Typical values)
OUTPUT VOLTAGE	0~rated (Max rating 2250V, menu Settings, numeric or coded knob input)
OUTPUT CURRENT	0~rated (Max rating 10000A, menu Settings, numeric or coded knob input)
OUTPUT POWER	0~rated (Max rating 180kW, menu Settings, numeric or coded knob input)
Voltage accuracy	0.05%+0.05%F.S.
Current accuracy	0.1%+0.1%F.S.
Voltage current monitoring	Voltage/Current Monitors the output voltage: DC 0~5V
Display interface	4.3-inch TFT color LCD screen, supporting simplified Chinese, traditional Chinese and English
Operate interface	Function keys, digital keys and knobs (double knobs set voltage and current respectively)
Transient response	less than 2ms for the voltage of the equipment to recover the accuracy range of 0.75% of the rated value when the load changes from 10% to 90%
Parallel	Supports MAX 10 parallel master and slave of the same mode
PROTECTION	OV, OC OP over temperature, under voltage, etc
Communication interface	LAN, USB serial port (OPTIONAL GPIB, CAN, RS485)
Communication protocol	SCPI, MODBUS, CAN - Open PROTOCOL
Working temperature	0°C ~40°C
Altitude	<2000m
cooling way	intelligent air cool control
