Framed Glass Balustrades

Using satin or mirror polished stainless steel tube handrail, with stylish modular stainless steel components and toughened glass. This provides a balustrade that is suitable for almost any application, including stairwells, decking and balconies.

Timeless design is suitable for almost any location.

Suitable for surface (floor) and fascia mounting.

Building regulation compliant tested to BS 6180:2011.

Standard Specifications

48.3 mm diameter stainless steel balustrade post.

48.3 mm diameter stainless steel handrail.

Modular stainless steel components.

10mm toughened glass panels- cut to size to suit project.

Grade 304 or 316 stainless steel

Satin or mirror polished finish (mirror finish recommended for coastal areas).

Semi Frameless Glass Balustrades

These are a combination of stainless steel balustrade posts or handrail with toughened or laminated glass panels. Ideal for patios, decking and balconies.

Economical, simple & stylish design.

Easy to install.

Building regulation compliant tested to BS 6180: 2011.

Standard Specifications

48.3 mm diameter stainless balustrade posts.

10 mm toughened or 11.5 mm laminated glass.

Grade 316 marine grade stainless steel handrail.

Satin or mirror polished finish

Clear or frosted glass.

Frameless Glass Balustrades

These balustrades differ from our standard Framed Glass Balustrades as they have no upright posts or handrail. The structural strength is in the glass which is supported by a stylish aluminium channel.

Suitable for domestic and commercial settings and is a perfect balustrade choice for balconies, patios, garden decking and various retail and leisure applications.

Wherever your design flair demands a safety barrier that allows seamless views with plenty of light, frameless glass balustrades, with no handrail, are the ideal solution.

A stunning contemporary design, which;

- Makes the most of your views
- Blends with any surrounding
- Building regulation compliant tested to BS 6180: 2011

Standard Specifications

Choice of aluminium channels balustrade
15 mm toughened or 21.5mm laminated glass.
Can be supplied with or without handrail.
Clear or frosted glass available.

Industrial Balustrades

When you need hard wearing qualities for harsh environments, our industrial balustrades and handrail, manufacture from either galvanised steel or aluminium, provide the durability to stand the test of time.

They are ideal for chemical production sites, factories, water treatment facilities and exposed locations such as rooftops and lighthouses.

Our aluminium range of balustrades feature an environmentally friendly design with modular construction that minimises noise, waste and energy consumption.

The balustrade is ideal for safety railing, industrial guard rails, adjustable ramp handrails, roof edge protection, standing-seam roof edge protection, access walkways, mezzanine floors and ventilation grilles.

As well as being 1/3 of the weight of steel for easy installation and manoeuvring, aluminium is corrosion free and fully recyclable.

Balustrades and handrails are available as mill finished or with a powder coated handrail options for visual contrast.

Components are designed for ease of assembly utilising mechanical fasteners with smooth top handrail connections to provide tactile comfort.
