

Carbon Reduction Plan

Supplier name: SET Healthcare Ltd

Publication date: 1st June 2024

Commitment to achieving Net Zero

SET Healthcare Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024	
Additional Details relating to the Baseline Emissions calculations.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	No prior reporting - 2024 is the baseline year
Scope 2	No prior reporting - 2024 is the baseline year
Scope 3 (Included Sources)	No prior reporting - 2024 is the baseline year
Total Emissions	No prior reporting - 2024 is the baseline year

Current Emissions Reporting

Reporting Year: 2025 to be the first year of reporting - no prior reporting

EMISSIONS	No prior reporting - 2024 is the baseline year
Scope 1	No prior reporting - 2024 is the baseline year
Scope 2	No prior reporting - 2024 is the baseline year
Scope 3 (Included Sources)	No prior reporting - 2024 is the baseline year
Total Emissions	No prior reporting - 2024 is the baseline year

Emissions reduction targets

In order to achieve Net Zero, we have adopted the following carbon reduction targets.

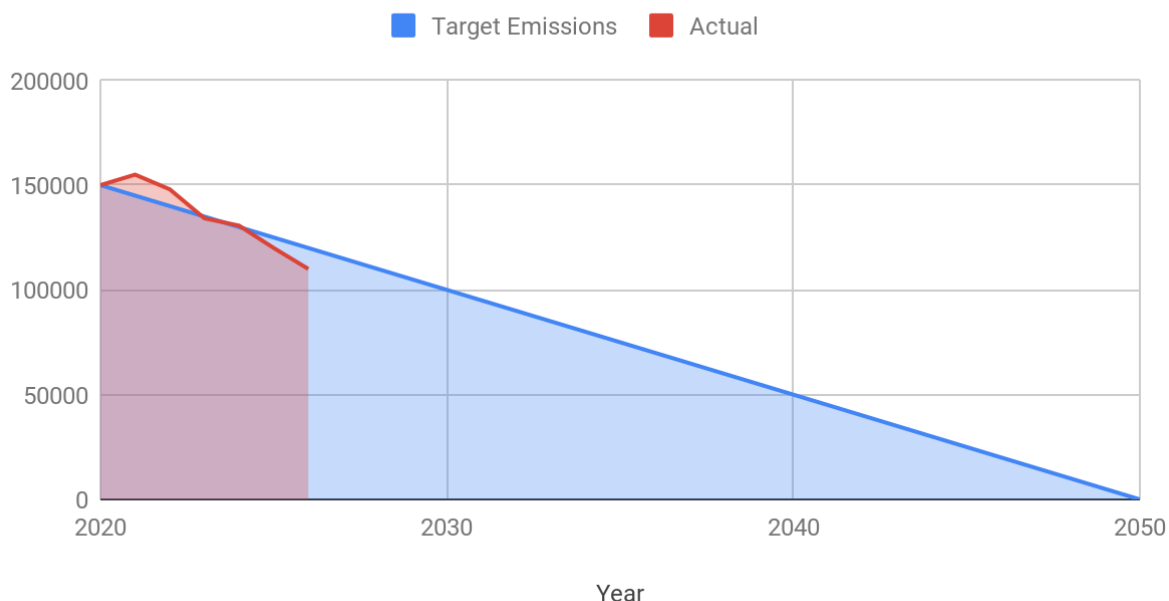

We project that carbon emissions will decrease over the next five years to **112500** tCO₂e by 2027. This is a reduction of **10%**

N.B. As 2024 is our baseline year, we are unable to estimate actual values in the above paragraph at this stage.

2024 is the baseline year.

Progress against these targets can be seen in the graph below:

Carbon Reduction: Projected vs. Actual

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been implemented/are due to be implemented commencing the 2024 baseline.

N.B. As 2024 is our baseline year, we are unable to estimate actual values in the above paragraph at this stage.

2024 is the baseline year.

- Reducing business travel by 25% plus within two years. We aim to achieve this by:
 - Introduction of a company-wide travel policy that restricts employees business travel to urgent or business critical journeys; aided by increased use virtual communication technology.
 - Focusing on the most energy-efficient transportation methods when travel is undertaken.
- Procuring energy from renewable sources.
- Introducing a policy to increase vetting of our suppliers of goods and services to ensure that their approach to and policies around Carbon Reduction are in line with our own.

- **Declaration and Sign Off**

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

NB: 2024 is the baseline year – no emissions reported to date.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Danny East
