### **NexESS Analytics Introduces its Energy Storage Commissioning Support Platform**

Denver, CO – May 2, 2022 – NexESS Analytics (NexESS), the leading provider of battery energy storage system (BESS) operational reporting and analytics solutions for asset owners has introduced its energy storage system commissioning support platform. NexESS provides constructors, developers, and/or asset owners third-party guidance, analysis, and process oversight during the commissioning process to ensure BESS financial success.

Cory Schaeffer, NexESS Co-Founder, said “Our product development plan, which we have been executing and expanding since the beginning, is grounded by the desire to enable successful operating storage projects through the combination of deep energy storage expertise and independent support. Our BESS commissioning support platform is our first pre-operational product, developed to ensure BESS projects enter operations with the best chance for success.”

Supported by the analytical power of BESSiq™, our BESS commissioning support platform is built on the team’s experience with contractual requirements, factory test reports, BESS controls design, performance testing, and BESS operational behavior. More than 25 years of BESS, product development, and project development are utilized in our BESS commissioning support platform.

Regarding our BESS commissioning support platform’s capabilities, Sean Halloran, NexESS Analytics CTO and Co-Founder, said “Our experience with BESS commissioning can be utilized for many different project situations, such as multiple controls solution providers, complex offtake agreement requirements, and inexperienced contractors. Our BESS commissioning support platform goes beyond simple owner’s engineering support for your assets with the right information to commission your BESS on time.”

#### **About NexESS Analytics**

The NexESS Analytics mission is to provide BESS owners/operators with curated data and devoted resources to visualize asset performance, understand BESS reliability, proactively identify issues, and optimize revenue generation. NexESS Analytics consists of industry veterans passionate about energy storage and assisting clients navigate the new energy landscape.

NexESS Analytics, Inc. is headquartered in Denver, Colorado with an additional office in North Carolina. For more information, visit [nexess.io](https://nexess.io).
