KING AIR ICE LIGHT WINDOWS

Since our LED Ice Light was PMA approved, customers have asked for a new Ice Light Window. Even our super-long life LED Ice Light can be hampered by an old, crusty, yellow, crazed window.

The PWI Ice Light Window an exact replacement and fits without modification - the way you expect.

Is the Ice Light Window only about weather? No. It's also about safety. A new LED Ice Light and a new window ensures you are seen during taxi, takeoff and landing. And, when you need it for ice detection, of course it's ideal.

Now whether you upgrade your Ice Light with our LED, or you just need a new window, PWI has the solution for your King Air and 1900. Again.

**QUALITY.
PERFORMANCE.
RELIABILITY.**

Notched Window

Square Window

ADVANTAGES:

- ✓ New window ensures maximum available light
- ✓ Direct replacement, no modification required
- ✓ Pair with PWI LED Ice Light for long life

TWO WINDOW DESIGNS:

4000041-000 notched corner window,
replaces Textron P/N 101-360190-0001.

4000041-001 square window,
replaces Textron P/N 50-361127-5.

KING AIR 300 / B300 / 350

LED INTERIOR LIGHTING UPGRADE

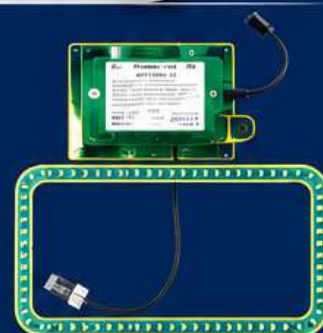

This STC-approved 300 series King Air LED upgrade is more energy-efficient than fluorescent lighting, lasts longer, and saves money over the life of the aircraft.

The LEDs install into the same locations as the fluorescent lights and are a fit, form and function direct replacement. The system features the correct connectors for a plug and play installation.

PWI offers two color temperature options:

Warm White at 4100K and **Cool White at 5100K**.

These LEDs use the original aircraft dimming controls.

**6 POWER SUPPLIES
36 OR 42 LIGHTS**

KEY BENEFITS

- ✓ Direct Replacement for Fluorescent Lights
- ✓ Plug-and-Play Installation
- ✓ Uses Existing Bright/Dim/Off Controls
- ✓ Eliminates Fluorescent Ballast Noise
- ✓ Lower Power Consumption
- ✓ Longer Service Life
- ✓ Reduced Maintenance Costs
- ✓ STC Approved Solution
- ✓ 3-Year Manufacturer Warranty

CERTIFICATIONS

- FAA STC: SA01634WI
- EASA: 10047156
- ANAC: 2015S05-04
- AFAC: IA-813/2022

KING AIR / 1900 LED WINGTIP LIGHTS

LED Exterior Lighting Upgrade

Finally, you can add LED wingtips to your King Air. STC-approved and a direct fit, form and function replacement.

350 MODEL

90, B200/250, 300 & 1900 MODEL

ADVANTAGES

- ✓ STC Approved
- ✓ Uses TSO-Approved Lights
- ✓ Plug and Play Install
- ✓ Fit, Form and Function
- ✓ Lower Current Draw
- ✓ Brighter Than Bulbs
- ✓ Long Life LEDs
- ✓ No Maintenance
- ✓ 5 Year Warranty
- ✓ STC Documentation Included

BENEFITS

- ✓ Super bright for enhanced visibility on the ground and in the sky.
- ✓ Far less heat – prevents lens warping, crazing and discoloration.
- ✓ Reduces electrical load on motor-driven generators.
- ✓ Lower current draw than traditional bulbs.
- ✓ Eliminates high voltage strobe power supplies.

KING AIR 90/100/200/ B200/250 LED UPGRADE

LED INTERIOR LIGHTING UPGRADE

ADVANTAGES:

- ✓ Plug and Play
- ✓ STC Documentation Included
- ✓ No High Voltage
- ✓ 3.2 lbs in Weight Savings
- ✓ Reduced EMI Emissions
- ✓ 4100K Color Temperature
- ✓ Eliminates Buzz of Fluorescent Bulbs
- ✓ Much Quieter
- ✓ Energy Efficient
- ✓ Long Life LED Technology

The King Air upgrade for the 90, 100, 200, B200/250 is the result of innovation and technology.

These LED upgrades feature reduced weight, increased the life span.

It's also easily installed while being much quieter and much more energy efficient than fluorescent lighting.

These LED cabin lights provide the same warm and inviting light as fluorescents, while also being cost effective over the life of the aircraft.

CERTIFICATIONS:

EXTERIOR UPGRADE

The SRI Entry Door LED delivers long life and powerful ground illumination for safe and confident boarding and disembarkation.

Flight crew and passengers will appreciate a well-lit ingress and egress to the aircraft. Everyone appreciates the attention to detail that adequate lighting produces.

It's the first thing they will see when boarding and the last thing when exiting. SRI's Entry Door LED sets the initial tone for the flight and then reinforces the positive flight experience when disembarking.

WHY UPGRADE TO PWI LED?

INSTANTLY REFRESH THE CABIN

Replace all original fluorescent lighting with new LEDs to instantly refresh the look and feel of the cabin.

ELIMINATE THE PROBLEMS

No more high voltage power supplies or hard-to-find lights, no more slow starts, flicker, buzz or humming.

BETTER LIGHTING EXPERIENCE

Add PWI PMA-approved LED reading lights and make the entire cabin new again with no maintenance.

BUILT ON EXPERIENCE

Put our more than 50 years of aviation lighting experience to work in your Learjet today.

ADVANTAGES

- ✓ PMA Approved, Plug-and-Play
- ✓ 100,000 Hour LED Life
- ✓ LEDs use 28 Volts from aircraft
- ✓ Replace all fluorescents, power supplies
- ✓ 4000K Color Temperature
- ✓ 3-Year Warranty

LED LOGO LIGHT LED LIGHTING EXTERIOR UPGRADE

MORE LIGHT. LESS POWER.
Brighter, cooler and longer life

RELIABLE & DURABLE
Designed for performance and safety

EASY UPGRADE
Direct replacement for halogen floodlight assemblies

Replaces light A70828,
LP1982SP and
34A0228070-67

Beech King Air and 1900 owners/operators will enjoy the power of the PWI LED Logo Light. The Citation X 750 also uses this light as a Wing Inspection light.

The PWI LED Logo Light replaces the halogen floodlight bulb that illuminates the vertical tail surface. Often a company name, logo, or other organization identity is painted there.

With 600 lumens more light output than a bulb, this very long life, low heat and bright LED delivers the illumination performance customers expect. 5000K color temperature makes it easier to see ice formation on the Citation wing at night.

NO SMOKING/FASTEN SEAT BELT GRAPHIC

INTERIOR UPGRADE

Refresh and update the interior of your King Air, 1900 or Pilatus PC-12 aircraft with the PWI No Smoking/Fasten Seat Belt Graphic. This PWI Graphic is a direct replacement for the Teledyne No Smoking/Fasten Seat Belt Graphic.

This easy to install Graphic upgrade is the answer to warped and deteriorating signage. Made of polycarbonate, the PWI No Smoking/Fasten Seat Belt Graphic lasts years longer, when paired with the PWI LED No Smoking/Fasten Seat Belt Light.

The Graphic installs directly into the fixture without major changes. Pairing The PWI No Smoking/Fasten Seat Belt Graphic with the PWI LED No Smoking/Fasten Seat Belt Light, saves on expense and downtime over the life of your aircraft. Improve the cabin appearance with the PWI No Smoking/Fasten Seat Belt Graphic.

ADVANTAGES:

- ✓ Direct Replacement for Teledyne Part # 1202-006-005
- ✓ Longer Life When Paired with PWI's LED No Smoking/Fasten Seat Belt Light
- ✓ 1 Year Warranty

AIRCRAFT COMPATIBILITY:

LED ICE LIGHT EXTERIOR UPGRADE

The PWI LED Ice Light features many improvements over the factory-installed incandescent bulbs. The LED Ice Light offers the light output necessary to check for ice formation. Enhancements include a significant reduction in power draw, as well as a lifespan of up to 100,000 hours. PWI's LED Ice Light also reduces radiant heat which can lead to long-term window degradation.

PW i LED READING LIGHTS

PW i's LED reading lights provide 33,000 hours of service, so our LEDs might be the last ones your aircraft will ever need.

Our LED lights are also whiter and more efficient than incandescent bulbs.

PW i LEDs operate on significantly less power and are far more cost-efficient over the life of the aircraft. PW i LED reading lights are PMA-approved in piston, turboprops, and jets.

Install PW i LEDs and never think about reading lights again.
