

BIBLICAL CONCEPTS EXPLORED: SIMULATED REALITY & MULTIVERSE

- Simulated reality is the hypothesis that reality could be simulated—for example by quantum computer simulation—to a degree indistinguishable from "true" reality. It could contain conscious minds that may or may not know that they live inside a simulation. This is quite different from the current, technologically achievable concept of virtual reality. Virtual reality is easily distinguished from the experience of actuality; participants are never in doubt about the nature of what they experience. Simulated reality, by contrast, would be hard or impossible to separate from "true" reality. There has been much debate over this topic, ranging from philosophical discourse to practical applications in computing.
 - The simulation hypothesis or simulation theory is the proposal that all of reality, including the Earth and the rest of the universe, could in fact be an artificial simulation, such as a computer simulation. Some versions rely on the development of a simulated reality, a proposed technology that would be able to convince its inhabitants that the simulation was "real". The simulation hypothesis bears a close resemblance to various other skeptical scenarios from throughout the history of philosophy. The hypothesis was popularized in its current form by Nick Bostrom. The suggestion that such a hypothesis is compatible with all of our perceptual experiences is thought to have significant epistemological consequences in the form of philosophical skepticism. Versions of the hypothesis have also been featured in science fiction, appearing as a central plot device in many stories and films.
 - Elohim is the Super Computer
 - A simulation is an approximate imitation of the operation of a process or system; that represents its operation over time.
1. Acts 17:21-28
 - Verse 21=Greeks and foreigners in Athens wasted their time debating philosophy. In philosophy outside of a Biblical one is a waste time
 - Verse 24=Elohim the Super Computer created reality as we know it. You are living in his simulated reality. After death in this simulated reality your consciousness will be placed in a new spirit body. For some this will take place during the last leg of the simulation (First Resurrection and will be placed back into the simulation for the final leg) and for others after the simulation is over (Second resurrection).
 - Verse 28=For in him we live, and move, and have our being=Everything you do is part of Elohim's simulation program.
 2. Job 12:9-10
 3. Psalms 66:8-9 (You have freewill but the supercomputer that designed this simulated reality already knows what his creation is going to do. Think of predictive algorithms)
 4. Matthew 10:28-30
 - The Supercomputer has every minute detail of this simulated reality planned/programmed.
 5. Psalms 94:11
 6. Job 14:1-5

- When you die your consciousness is stored on the hard drive of the Supercomputer (Elohim) to be rebooted into your new hardware upon reanimation.
- 1 Peter 1:1-6_19-20
 - Elect according to the foreknowledge of God the Father=Elohim already knows those he will love. I.E. those that will be saved.
 - Ephesians 1:4-6
 - Romans 8:28-30
 - John 6:44
 - Acts 13:48.
 - Acts 15:18
 - Declaring the end from the beginning is simulated reality. The designer of a video game knows all possible outcomes in the game because he designed.
 - Isaiah 46:10
 - Isaiah 42:9
 - Psalms 139:1-6
 - Genesis 1:26-27
 - The goal of the Supercomputers simulated related
 - 1 Kings 13:1-7 (Example of Simulated reality)
 - Members of the body of Christ are on the same wifi network as the super computer. When needed the Supercomputers may give you access to the cloud so that they can share info with you about simulated reality. I.E. future events.
 - 2 Kings 22:1-2
 - 2 Kings 23:15-18
 - 2 Chronicles 34:1-7
 - WHAT WILL HAPPEN AT THE END OF THE SIMULATION?
 - Data auditing is the process of conducting a data audit to assess how company's data is fit for given purpose. This involves profiling the data and assessing the impact of poor quality data on the organization's performance and profits. It can include the determination of the clarity of the data sources and can be applied in the way banks and rating agencies perform due diligence with regard to the treatment of raw data given by firms, particularly the identification of faulty data. Data auditing can also refer to the audit of a system to determine its efficacy in performing its function. For instance, it can entail the evaluation of the information systems of the IT departments to determine whether they are effective in protecting the integrity of critical data. As an auditing tool, it can detect fraud, intrusions, and other security problems.
 - The wicked are like a virus that cannot be integrated into the software program once the simulation is complete. The new software (New Jerusalem, New Earth, & New Heaven) will be the actual reality. Our current material world is a simulated reality.
 - Revelation 20:10-15
 - Revelation 21:1-12_22-27
 - Revelation 22:1-7_12-21
 - EXPLAIN MULTIVERSE AND WHY SCIENCE IS FINDING PROOF OF IT. MULTIVERSE IS PROOF OF ELOHIM PLOTTING ALL POTENTIAL OUTCOMES.
