

Thank you for your interest in our Directory of Fresh Pet Food Professionals. It's our goal to provide as many qualified resources as possible for the vast number of people seeking nutritionally adequate recipes to feed to their pets. For this reason, our baseline criteria involves the ability for professionals to formulate recipes that adhere to established nutritional guidelines (AAFCO, NRC or FEDIAF) and beyond meeting minimum established nutritional requirements.

We plan to include a summary paragraph and a photo or image in the profiles on the site. Please feel free to submit those to us when you return this form by email.

General Food Philosophy / Feeding Approach:

I believe in feeding species appropriate meals to our pets. I am honoured to have met Dr. Ian Billingham and Dr. Bruce Syme, who have been influential and key educators in my nutritional education. It is my philosophy, as per the five freedoms, that we should do no harm to animals, and this includes feeding them a nutritious meal which is appropriate to their needs.

Areas of Focus:

I focus on developing nutritionally balanced species appropriate meals for healthy cats and dogs. I do not formulate therapeutic recipes.

Experience / Education / Credentials / Apprenticeship/ Training:

I graduated with a Certificate in Nutrition from the National College of Traditional Medicine (NCTM) in 2016, the same year I started my company. I then pursued studies in Herbal Medicine, Canine Myofunctional Therapy and Canine Bowen Therapy. Graduating in the top percentile in each module. I have just completed a Diploma in Animal Naturopathy from the NCTM. I have also trained to be qualified as a Veterinary Nurse alongside Dr. Elaine Cebuliak of Animal Wellness Clinic, a holistic veterinarian who advocates raw and home prepared meals for pets. Once the course is available, I plan to upgrade my certificate in nutrition to a diploma. Dr. Billingham is currently developing the course content.

Continuing Education:

Enrolled to study Canine Fitness through CASI
