

## "Healing Through Art"

### Overview:

Healing Through Art focuses on enhancing the healthcare experience by integrating art and thoughtful design into clinic interiors across local and neighboring states.

### Our Approach:

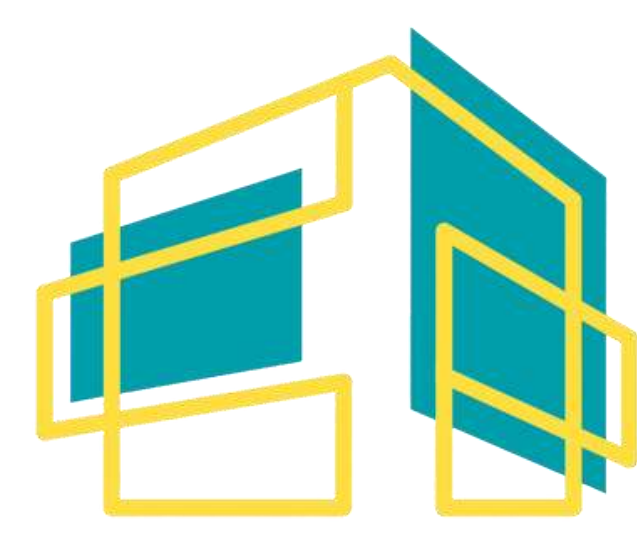

We develop unique, patient-centered designs that transform clinical spaces, making them more welcoming, comfortable, and supportive of healing.

### Impact on Patient Care:

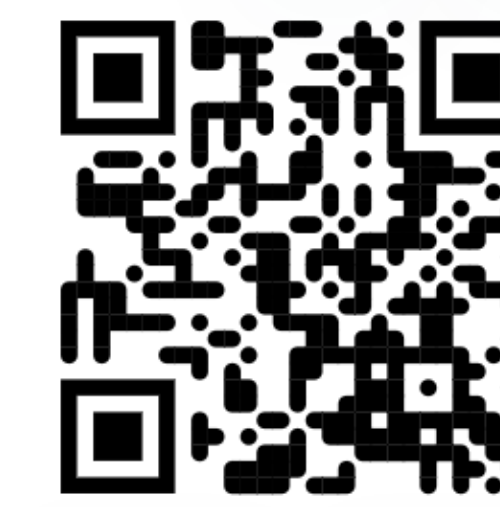

Through our designs, we aim to foster environments that not only ease patients' stress but also improve the daily experiences of healthcare providers, creating a positive ripple effect on care.

Cube360, a 501(c)(3) tax-exempt nonprofit organization, was founded by alumni and students from the University of Virginia, Johns Hopkins, and Stanford University.

## Cube360: Care, Unite, Build, and Empower Globally.

### Mission

To address healthcare disparities by providing support and supplying innovative and cost-effective building solutions for healthcare facilities/free clinics in the US/worldwide

### Vision

Extend accessible healthcare to communities across Virginia and beyond, reducing geographical and socioeconomic barriers

### Goal

Provide affordable opportunities for satellite buildings, permanent home, and more

### Value Proposition

Help clinics save on capital expenditures so that funds can be redirected to serve those most in need within our community

## What We Can Offer

### HIGH QUALITY

One-step integral molding, high fire rating

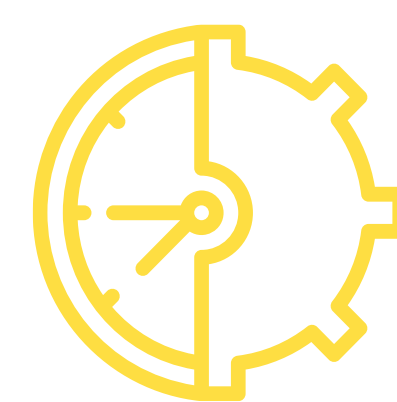

No joint, no cracking, and no water leakage

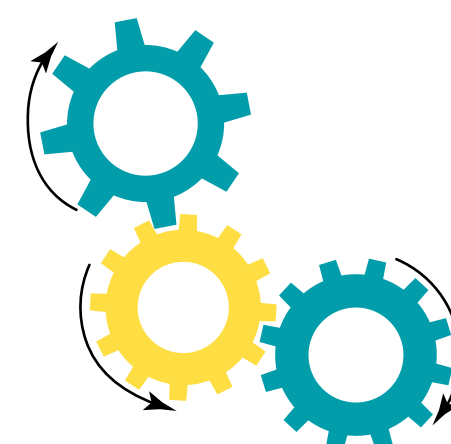

Resistance to typhoons and earthquakes of magnitude 8

### FAST

Construction efficiency

Quality control of the whole process, greatly improving efficiency

### HIGHLY ECONOMICAL

Mass production

Engaging design process

Off-site strategy

### GREEN

Thermal insulation. Sandwich-type insulation with low thermal conductivity

Reduce tree cuttings, construction waste

Low carbon. Reduces carbon emission significantly

### Modular

### Traditional

## Our Ongoing Efforts

### VR Mental Health Initiative

#### Overview:

We're advancing a VR project proposal to support mental health through immersive experiences focused on reducing stress and anxiety.

#### Progress:

In collaboration with UVA's CAPS and CSC departments, we've reached the next phase for the Jefferson Trust Funding Grant, moving us closer to potential implementation.

#### Impact:

This project aims to transform mental health support, making it more engaging and accessible.

### Entrepreneurship Cup Competition Finalist

#### Recognition:

Our initiative has been selected as a finalist in UVA's Entrepreneurship Cup Competition under the Social Entrepreneurship category.

#### Focus:

This recognition highlights our commitment to innovative, socially-driven solutions that aim to make a meaningful impact in healthcare and community wellness.
