

Heart Screenings for High School Athletes

\$15 Sports Electrocardiogram (ECG) Screenings

High school student athletes in Brevard, Orange, Osceola and Seminole counties are now required to complete an electrocardiogram (ECG) screening prior to participating in school sports. These screenings may detect unknown heart issues and prevent life-threatening heart arrhythmias.

AdventHealth Medical Group Pediatric and Adult Congenital Cardiology offices are now offering ECG screening appointments, where all scans will be reviewed by our experienced cardiologists. Athletes whose ECGs are found to be abnormal can be seen for a full evaluation by an AdventHealth for Children cardiologist, often during the same visit.

- **Results are provided at the time of the appointment.**
- **Multiple insurance providers are accepted, with \$15 self-pay option.***
- **Extended hours, including weekend appointments are available.****

AdventHealth
for Children

A part of AdventHealth Orlando

The sports ECG screening does not replace your child's required sports physical or cardiac clearance if required. This is only an ECG test. To complete the sports physical paperwork, you must schedule this with your child's pediatrician.
*No referral required if \$15 out of pocket cost selected. A referral is required for insurance billing.
**Extended hours are for select locations only and available August through September.
