

MARQup™ tool

Build - Analyze - Track

We believe that if you have a map to where you want to go, you'll get there faster and with much less risk. Getting what you need in your business deals is no different. The MARQup tool provides a digital map of your key contract terms, assigning a risk value to each term and a tool to analyze and score your negotiated contract. You will not only get a contract map that identifies key terms, but you also an interactive guide on how to close your next deal. Use this tool to analyze your current deals against your contract map assisting you in streamlined deal negotiations, understanding what deviates from your standards -- giving your team the power to plan and close deals faster.

Frictionless Contracting

Business moves fast and you don't have time for long negotiations on items that don't add value. You need to quickly evaluate the risk, make an informed decision and get the deal done. You need a way to get a contract in place quickly, without wondering what you just signed up to. **ContractsRx** takes the friction out of contracting - less time, less cost, less risk. We build the tools that deliver frictionless contracting.

ClickTracts

Click - Contract - Done

Send us your standard agreement. We'll analyze your document and transform it into a web-based hosted contract. Next, select the business variables that fit your deal. We integrate a dropdown feature list into each contract, allowing you to create and change contracts in a modular way. With one-click, ClickTracts creates a unique URL for your business deal. Simply email the link to the other party and they'll click-to-accept. Build it once - use it again.

SumTracts™ tool

Locate - Summarize - See

Our AI-powered, fully integrated contract summary engine searches your contract repository to create contract summaries. The SumTracts summaries *Timeline* feature shows you all of your contracts with the same party so you know where the current contract fits in the overall contracting relationship. The SumTracts tool provides you key information about each agreement and gives you an easily searchable contract summary that lets you easily identify risk.
