

Fuji Steak & Sushi Serves Up Freshness Daily

Fuji Steak & Sushi has been impressing diners for years and has been voted Best Sushi and Japanese in Chattanooga.

Fuji manages to top its competitors due to the freshness and quality of the food served amid its chic decor. The restaurant uses high-quality meats from a Japanese company such as filet mignon or choice filet; the vegetables are fresh, never frozen; and other items are kept fresh daily such as shrimp, scallops and fish for the sushi. The sauces which tantalize diners' taste buds are homemade and prepared daily, sometimes even twice a day due to the high demand!

Fuji's motto is "Your health is our ultimate goal!" and the restaurant only serves patrons healthy, nutritious ingredients. Recently, the sushi bar scored a 100 and the kitchen scored a 96 on their health inspection.

Fuji's skilled chefs are trained professionally and hail from the Big Apple and Manhattan. They're outstanding at preparing the most popular and delicious

sushi. The staff, especially Xiu Feng Lin, the owner, loves meeting new people every day and that every day they can expect something different.

Fuji offers new specials monthly, so don't hesitate to head over and experience the "Best of the Best" for yourself.

Concrete Repair Specialist Celebrating 15th Anniversary

David Gordon was in the midst of renovating his former historic home in Ferger Place when he had a realization that there was a need for decorative-concrete repair. Up until August 2001, he worked as a direct importer of antiques, reproductions, cut glass, iron, and marble statuary. But with the invention of the internet, sales soon began to decline as a result of retailers direct-ordering.

On Sept. 11, 2001, tragedy struck the nation when terrorists crashed into the Twin Towers in New York City. The country stood still and everyone stood still with it, including businesses — like Gordon's then-month-old concrete repair venture. Three years later, the nation was rebuilding and so was Gordon.

Concrete Repair Specialist is a popular search on the internet as well as an acronym with which numerous people are familiar. The business specializes in decorative concrete systems, polished concrete floors, concrete restoration, crack repair, concrete overlays, epoxy coatings, protective sealants, resurfacing,

new concrete pours, moisture remediation and control, underlayments, and concrete toppings. Gordon, who now has over 30 years in all aspects of construction, is master certified in over 12 areas of concrete specialization.

CRS is a family owned company. Gordon is the president and his wife, Sharon, is the general manager. Joseph Simmons III and his son, Joseph Simmons IV, are technicians, and although they are not related to the Gordons, they may as well be as they celebrate their 15th anniversary together as a company.

Concrete Repair Specialist doesn't take shortcuts. The business performs quality repairs and uses quality products. If you're interested in seeing some of the public repair projects CRS has been a part of, check out the restoration of Ruby Falls' front entrance, the courtyard at Rock City's Grandview, and the Choo Choo apartments' pool deck. Along with the repairing and replacement of concrete structures, CRS offers a range of custom installations from custom patios and driveways to pool decks and docks.
