Re: Water Billing

Please be aware that our district's remote water meter reading equipment recently failed, and we have been challenged to replace it. To keep billing cycles as current as possible we have issued the enclosed quarterly bill based on normal standard usage.

We anticipate having new reading equipment in place in time to take actual meter reads for the next quarterly cycle. At that time, we will calculate any water use overage or underage using a two-quarter average use.

Please pay the enclosed bill within 30 days. Should your water use habitually be under the standard amount please contact the PLVD at 603-746-2010 to request to have a reduced bill immediately considered.

Thank you for your patience and timely payment.
