The treatment is tentatively scheduled for late May, with follow-up fluridone treatments in mid-June & late June/early July 2023. Based on past experiences, we expect that the State will impose restrictions on the use of treated lake water for irrigation purposes. The specific use restrictions will be determined at the time the permit is issued and will be communicated directly to you in the notification of treatment that will be sent by certified-mail prior to each different herbicide treatment.

The fluridone restrictions apply to all intakes within 1,320 feet of the treatment area, and to all wells within 50 feet of shoreline that itself is within 1,320 feet of a treatment area. Intakes (black pipe) that draw water directly from **Pillsbury Lake** within 1,320 feet of proposed treatment areas WILL be subject to irrigation restrictions. If you have a well within 50 feet of the lake or an intake, please let us know by contacting our office weekdays at (866) 480-1271 or by emailing NewHampshire@SolitudeLake.com. Please be sure to reference **Pillsbury Lake** in your email.
