## Exploding Peep Geyser

Supplies Needed: Small Empty Gatorade Bottle, 3 Peeps, Microwave

### Directions:

- o If your Gatorade bottle is too tall for your microwave, cut a few inches off the top of the bottle.
- o Squish your Peeps into the bottle.
- o Place your peep filled bottle in the middle of the microwave. It will only take about 30 seconds before the explosion is over so be ready. The peeps actually fly out of the bottle.
- o Just like regular Marshmallows, this sticky pile became hard as it cooled. Surprisingly, it is not hard to clean up at all. Thank goodness for dishwashers.
