

Creekside Medical Clinic 3104 Creekside Village Dr, STE201, Kennesaw GA 30144
ANNUAL PHYSICAL INFORMATION

Annual physicals or preventative visits address your overall physical and emotional wellbeing by evaluation of your exercise and dietary habits, lifestyle behaviors, screening labs, as well as current medications and vaccinations and review of chronic but well-controlled medical conditions like blood pressure, arthritis, diabetes, etc with the aim of developing a long term goal. Regular office visits differ from preventative care in that either new-onset or other chronic medical conditions which need further evaluation are addressed on an ongoing basis to work towards a specific goal. These types of problems need to be addressed in an appointment separate from a preventative exam. If, however, your preventative services have been adequately covered during your scheduled physical, and if there is extra time available, you may be able to address other concerns with your provider. With this in perspective, insurance carriers do allow providers to address additional complaints beyond your physical examination if there is time to do so. However, a regular office evaluation code will be added to the preventive visit code which will entail an additional copay, coinsurance, or deductible. Also depending on the degree of difficulty or the amount of time spent, a regular office fee in addition to your preventative visit may be charged. Your provider will speak with you about this prior to the same. Please feel to talk to the staff if you have any questions regarding your preventative care charges today.
