# Our Services

---

---

## PHYSICAL AND COUNTER SURVEILLANCE

**Alma** Security Services has established an elite counter intelligence unit, trained in the Middle East, Switzerland and the United Kingdom. This unit specialises in electronic sweeping for hidden surveillance equipment on people, in vehicles or aircraft, on board of marine vessels, within building structures and communication equipment such as telephone exchanges.

The main function of the CICM unit is to detect, deter and defend. Covert electronic surveillance equipment is freely available and is used by criminals to obtain sensitive or confidential information. It is of utmost importance to be pro-active to prevent becoming a target of information theft. Counter surveillance may include electronic methods such as bug sweeping, detecting of all kinds of surveillance devices, as well as counter surveillance software to thwart cyber criminals. Counter surveillance will employ a set of actions that when followed, reduce the risk of surveillance.

## OFF-SITE MONITORING:

Our SAIDSA approved control room is fully equipped to cater for all day to day operational requirements, satellite tracking, live guard tracking, special event control and off-site cctv monitoring. Equipped with the latest technology and our own communications network, we offer a 24/7/365 monitoring solution that uses cutting edge video content analysis software to detect and deter any criminals from breaching perimeter boundaries. In addition to a conventional Control Room, **Alma** Security Services has highly trained staff monitoring services such as a National 086 crime line, vehicle satellite tracking, alarm response and an electronic occurrence book.

## CIVIL AND CRIMINAL INVESTIGATIONS

Our Civil & Criminal Investigations unit is managed by seasoned investigators and consultants. We deploy all our resources in support of your pending civil or criminal case to ensure the best possible outcome. They are responsible for acting upon intelligence received and then building a case

# Our Services

---

---

## **SECURITY OFFICERS – COMMERCIAL/RETAIL/INDUSTRIAL:**

Equipped with two way radios, cell phones and First aid kits, **Alma Security's** operational guards and vehicles react and respond to any situation or incident.

## **SECURITY OFFICERS – ARMED /UNARMED:**

Armed reaction officers, trained in firearms, hand-to-hand combat, legal aspects, fire fighting and basic first aid, will react to any call out with great efficiency and prompt response times.

In addition to armed or unarmed officer abilities, inspectors are trained in defensive driving skills, health and safety practices, first aid, basic fire fighting and site specific requirements as requested by customers.

## **GUARDING SOLUTIONS**

Operations typically include the management of specialised trained security personnel that attend to the everyday needs of both customers as well as active field officers.

# Security and Related Systems

With the technical capabilities intrinsic to the organisation, Alma Security Services has the ability to incorporate a wide range of technologies within its solutions

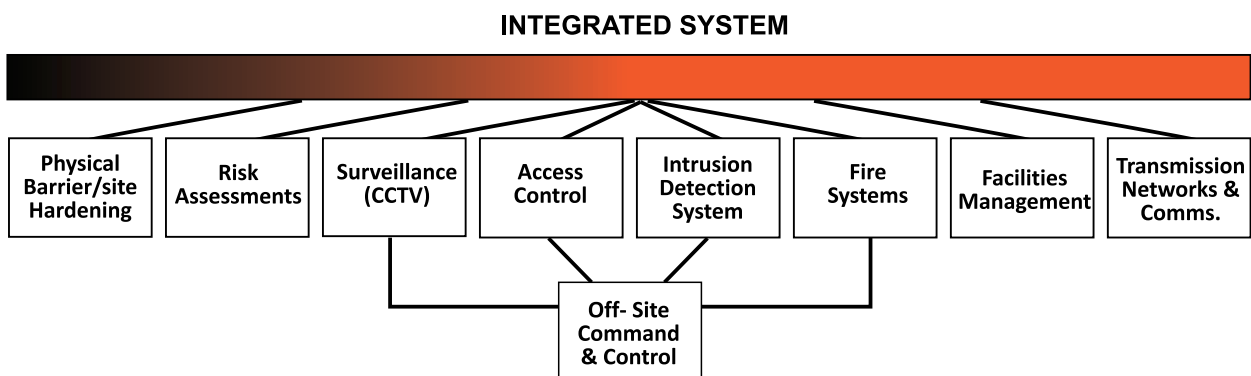

These Include:

- Access control systems including biometric readers
- Video badging systems
- Time and attendance systems
- Guard tour systems, free-standing or integrated
- Information and Communication technology
- Alarm management systems
- Asset tracking and tagging (RFID)
- Fire Detection
- Control room design
- Evacuation systems
- CCTV local or networked
- Building management systems
- Network design (copper or fibre)
- Service and maintenance
- Video management systems

## Integrated Systems

Alma Security Services adopts a client based attitude to requirements, directing the technical solutions towards the client's needs, as opposed to basing all solutions on a single technical platform. In this way, client preferences can be accommodated from the outset.

At the same time, Alma Security Services has unique and privileged access to a range of Access Control and Perimeter products, as well as Video Management Systems, which allow total integration where enterprise wide solutions are required with special data management demands, and where Wide Area Networking features are prevalent. This includes the provision of complete in-house Control Centres so that clients can manage their own systems and facilities.

# Corporate Social Responsibility

---

---

**AMLA believes in uplifting and grooming all forms of talent within disadvantaged communities and leaving behind a lasting impact in communities we have performed work in. We are driven by the need to create better opportunities for the less privileged communities in the form of Education, Sport and Life Skills Development for the less privileged communities In South Africa**
