Kansas City, MO. 64108

To Whom It May Concern:

Gateway Packaging Company enrolled in the Missouri Enterprise and Business Retention Program with the Missouri Career Center in Kansas City in 2008. We had been enrolled in a similar state program approximately 10 years ago. But because we had not retained any of the employees for the required length of eligibility, we never received any funds associated with the program. Consequently, we were somewhat cautious in regard to enrolling in another state sponsored program with the Full Employment Council.

However, this new program has proven to be very beneficial for us during the past 6 months. The FEC does a very thorough job of screening and testing the applicants before sending them to us for interviews. We have hired close to 35 applicants from this FEC program, and we have found them to be for the most part, very proficient in the positions hired into, have good attendance patterns, and seem genuinely interested in doing a good job.

Our experience with this program has been exceptional this second time around. We have found the contacts with the FEC to be very professional, highly motivated, willing to go the second mile if needed, and a genuine joy to work with. We would highly recommend this program to employers in the Kansas City area who are looking for quality employees for their places of business.

Gateway Packaging Company thanks you!!

Sincerely,

Sharon S. Tuttle
Human Resources Manager
