

Dear Mr. Shew:

I was delighted to hear about the Full Employment Council's program we discussed to provide our employees with skills development and training and our company with a useful assessment of our internal processes and systems.

By way of this letter, Medical Positioning, Inc. commits to providing training and development opportunities for our employees and providing appropriate compensation increases to them in recognition and utilization of their new skills.

Additionally, and pursuant to your request, below is a brief description of our company and the work that we do in the biotechnology and pharmaceutical research arena.

Medical Positioning, Inc. Company Background

Located in Kansas City, MO, Medical Positioning, Inc. (MPI) manufactures and sells patented specialty tables and devices designed to improve diagnostic imaging and patient outcomes in cardiology, radiology and mammography. The company's products enable hospitals and physicians to significantly improve the quality of the images they obtain from their ultrasound and x-ray equipment. The Company's products are used around the globe and can be found in 47 of the 50 of America's Best Hospitals as rated by US News and World Report.

MPI's products are commonly used in the academic and research arena, primarily during pharmaceutical clinical trials and new compound development studies. Some recent customers in these fields are listed below.

Biotechnology & Pharmaceutical Customer Profiles

EPIX Pharmaceuticals is a biopharmaceutical company focused on discovering and developing novel therapeutics through the use of its proprietary and highly efficient in silico drug discovery platform. The company has a pipeline of internally-discovered drug candidates currently in clinical development to treat diseases of the central nervous system and lung conditions.

GlaxoSmithKline is one of the few pharmaceutical companies researching both medicines and vaccines for the World Health Organization's three priority diseases – HIV/AIDS, tuberculosis and malaria, and are very proud to have developed some of the leading global medicines in these fields. Headquartered in the UK and with operations based in the US, they are one of the industry leaders, with an estimated seven per cent of the world's pharmaceutical market.

We look forward to getting this program kicked off at MPI.

Respectfully,

Ruben F Salinas
President & CEO
Medical Positioning, Inc.
