Goals and interests	<p>A leader and visionary with excellent analytical skills, I have 35 years of experience as a general and borough manager as well as in the practice of urban planning in municipal and regional environments. My interventions are focused on results in relation to the principles of Lean Management such as the optimization of operational activities and the constant search for innovation. I am interested in the elaboration of innovative strategies based on the vision of integrated development of organizations and efficiency objectives leading to concrete actions and quality control tools. My fields of expertise include management of organisations, economic development, strategic and operational planning, management audit, project management, organizational diagnosis and resource recovery plans, sustainable development plan, financial management of projects, urban and economic space management, all aspects of urban planning. I have a mobilizing leadership that favors the integration and development of the best management practices of municipal, governmental and private organizations in collaboration with the actors involved, employees and decision-makers.</p> <p>Inspired by a great passion for management strategies, I have taken on many challenges and projects, both in the organization of municipal services and in the urban space (Maison du citoyen, modern library, sewer and waterworks infrastructures, etc.) for the greater interest of managers, elected officials, citizens and stakeholders. The search for efficient management and the achievement of results following management analysis processes, awareness and mobilization of partners (private and public) are also the objectives sought in my professional practices.</p>
Professional skills	<ul style="list-style-type: none"> - Experience in senior level management of municipal organizations of various sizes, regional as well as private. - Mobilizing leadership and municipal governance (redressing organizations, strategic vision, structure, results). - Strategic planning and operations management. - Exceptional managerial courage. - Excellent knowledge of municipal and Quebec's legal framework (City of Montreal and other municipalities). - Lean management-management techniques. - Management of financial and human resources. - Network of privileged contacts with the government, cities and MRC. - High political and strategic sense and exceptional knowledge of the municipal apparatus. - Land development and urban planning, project management, team management.
