

Easy to share  
important milestones  
and activities

*An accessible and empowering app developed to help and assist young people communicate their views in a way that suits them.*

Journals enables an elected staff member \*companion or the young person to easily **record audio voice clips**, **write or dictate personal letters**, **upload images or photos** and **upload or record videos** in a secure, cloud-based app and make content available to key stakeholders, who might otherwise miss these important milestones.

Content is shared **privately** and **securely** (closed group), ensuring recipients are a key part of the special moments of the young person's life.

A unique feature of the Journals service is that it provides users with the ability to post multimedia content as a moment, so that updates, invites and messages can be delivered on a specific date, even in the future.

This also enables key workers and the team around the child to upload and share content post activity, at a time convenient for them.

Ideal for

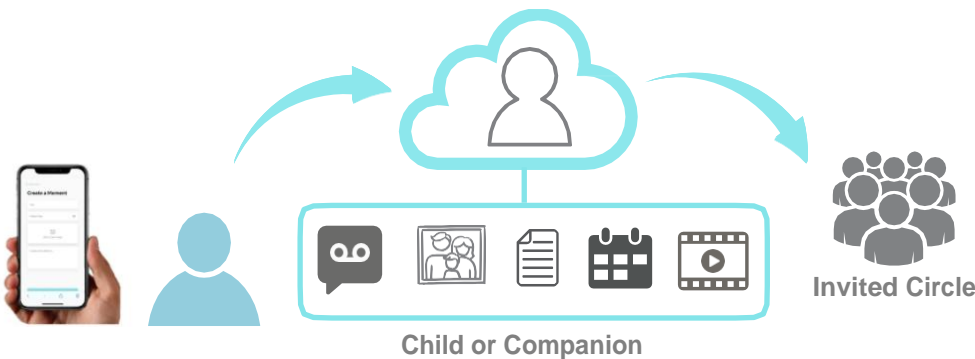

- Managing wellbeing and reducing related anxiety
- Progress or review updates
- Sharing photos and updates with audio explanations
- An activity or shared experience update for social workers
- A daily journal for positive mental health and well-being outcomes
- Scheduling a meeting date with a future post and related link

\*Companion is a trusted person (key worker) who can act on behalf of a young person or multiple young people, to create or share moments (with appropriate permission), so ideal

All content stored in a  
secure cloud-based  
environment

for all types of work and daily activity, including journaling, storytelling, scrapbooking, activity, or event updates, and so much more.
