

5 Steps to Build Business Credit from Scratch

Building business credit isn't just for big corporations. You can start right where you are, even as a brand-new entrepreneur. Follow these 5 simple steps to begin building real credit in your business name -- without relying on your personal score.

1. Get Your EIN - Apply for your free Employer Identification Number at [IRS.gov](https://www.irs.gov).
2. Form Your LLC - Register your business as a legal entity through your Secretary of State.
3. Open a Business Bank Account - Use your EIN and LLC paperwork to keep business funds separate.
4. Get a DUNS Number - Register for free at dnb.com to start building your business credit profile.
5. Apply for Starter Net-30 Accounts - Use vendors that report to business credit bureaus (like Uline or Grainger).

Need help getting this done step by step?
