

7 Steps to Start a Legit Business

Starting a business is more than just having a good idea -- it's about setting it up the right way so you're protected, organized, and ready to grow. These 7 steps will help you start your business legally and professionally.

1. Choose Your Business Name - Make sure it's unique and reflects what you do.
2. Apply for Your EIN - It's free at IRS.gov and you'll need it for taxes and bank accounts.
3. Register Your LLC - File with your state's Secretary of State website.
4. Open a Business Bank Account - Keep business and personal money separate.
5. Get a Business Phone, Email & Website - Present your business professionally.
6. Apply for Business Licenses - Check your state/city requirements and stay compliant.
7. Track Your Money - Use tools like QuickBooks or Wave to monitor income and expenses.
