

1st BBQ meet and greet for TS families

Educational Event

Christmas in July 2017

Soaring
Butterflies
for Turner
Syndrome, Inc.

What is Turner Syndrome?

Turner Syndrome (TS) is a rare chromosomal disorder that affects females. The disorder is characterized by partial or complete loss of one of the X chromosomes. TS can differ dramatically from one person to another but females can develop many symptoms, affecting many different organ systems. These symptoms include ovarian failure, abnormalities of the eyes and ears, skeletal malformations, heart anomalies, kidney abnormalities, immune deficiencies, webbing of the neck, and other conditions. The average age of diagnosis is 9 years old.

Who We Are

Soaring Butterflies for Turner Syndrome, Inc. was established in 2015 by Darlene Hay, President. Darlene has a daughter with TS and needed to find a way to reach out to other families to let them know they were not alone and to offer support in a very significant way. The board of directors and advisory committee are made up of families personally affected by TS who share in their experiences and offer strength and encouragement so we may walk together in this journey. We are connecting families from Port Saint Lucie to the Florida Keys, and even internationally!

Darlene Hay, President of Soaring Butterflies for Turner Syndrome with her butterfly, Kylee

Board of Directors:

Darlene Hay, President
Veronica Woods
Jeannie DeMarzo
Marcus Woods
Baylee Hay
Cheryl Nathan
Liliana Mosquera

Advisory Committee:

Tamyka Silva
Veronica Hoyos
Wilson Pacheco

Our Mission

Soaring Butterflies for Turner Syndrome, Inc. is dedicated to providing resources and activities for individuals and families affected by Turner Syndrome through recreation, education, and community awareness.

We Need Your Help!

Your charitable donation allows us to fulfill our mission and get the correct resources to our “butterflies” so they may receive the medical attention, educational information, and social engagement opportunities they need to be the healthiest version of themselves. We want our butterflies to soar!
