

WHITEPAPER 1.0

1. Introduction

LocoEvo Poker, formerly Loco Poker, is a crypto poker platform that has been reimagined and acquired by NFT Evolutionz (NFTE). Our mission is to transform the landscape of crypto poker by leveraging state-of-the-art security, multi-chain integration, and community-first initiatives. As we rebuild from past challenges, our focus is on creating a secure, innovative, and engaging gaming ecosystem that seamlessly integrates with the broader NFTE projects.

2. Background and Vision

The legacy platform, previously marred by security and management issues, has now been rebranded and revitalized under NFT Evolutionz. With a commitment to transparency, community engagement, and long-term value, our goal is to emerge as a major crypto poker competitor. We intend to set new standards in security, gameplay, and reward mechanisms while building a foundation that integrates with existing and future NFTE projects.

3. Technology and Security Enhancements

3.1. Upgraded Security and Back-End Infrastructure

- Multi-Signature Wallets:

Wallets will be managed via a multi-signature system, ensuring that multiple trusted staff members authorize transactions to prevent unauthorized activity.

- Enhanced Backend Systems:

Our platform has been overhauled with state-of-the-art security protocols to safeguard funds and user data, eliminating the issues encountered under previous management.

3.2. Multi-Chain Integration

LocoEvo Poker now supports a broad range of cryptocurrencies for gameplay, increasing accessibility and flexibility:

- XRP
- AVAX
- SOLANA
- HBAR
- COREUM

The integration of Coreum and Solana is a strong move to broaden the platforms reach, and further solidify our position in the Crypto Poker space.

4. Strategic Roadmap and Introduction Period

4.1. The 6-Month Introduction Period

Our initial six-month phase will focus on:

- **Expanding Reach:** Onboarding new players and expanding our community. All players will be required to re-register as we launch the platform with a clean slate.
- **Platform Optimization:** Continuously refining the platform's performance.
- **Profitability Assessment:** Evaluating key metrics to ensure sustainability before rolling out enhanced reward systems.

At the end of this period, we will reassess profitability and update our whitepaper and roadmap accordingly. Future iterations will detail rewards mechanisms to benefit all holders of NFTE projects.

4.2. Future Profit Sharing and Ecosystem Synergy

Once the platform achieves steady profitability, we will implement rewards enhancements across multiple chains to reward NFTE project holders. While we avoid overpromising at this stage, our commitment remains to build a resilient ecosystem where growth directly benefits our community.

5. Rake Play and Game Mechanics

5.1. Rake Play Information

LocoEvo Poker will offer a competitive rake percentage and an attractive rake back program from the outset, designed to incentivize gameplay while ensuring fairness and platform sustainability. From launch, Rakeback % will be credited to your LocoEvo account weekly.

5.2. Games Offered

Our platform will feature a variety of game formats, including:

- **Self-Start Games:** Allowing players to initiate tables at their convenience (Ring Games)
- **Scheduled Tournaments and Free Rolls:** Regularly scheduled events to engage the community and reward active participation.
- **Sit and go** – a mini tourney of winner takes all, game begins when required number of seats are filled
- **Spin and go** – Players start with 500 chips and blind levels increase every couple of minutes. At the start of the game, a reel will spin with multipliers to determine the prize amount; i.e. 10x the buy in (Spin & Go is available for special events only)

6. The LocoEvo Promise

We acknowledge the past missteps, and the damage caused to the community by the previous owner. While we cannot reimburse prior financial losses, we are committed to making amends through our Loco Promise initiative.

6.1. Snapshot and Trading Policy for Loco NFTs

- Snapshot Policy:

To ensure fairness and maintain the integrity of our community, a snapshot has been taken and announced to the community, to record current holders of Loco NFTs on both the XRPL and Hedera networks. These snapshots will determine eligibility for future rewards, including the RIPWALK token airdrop.

- Discouraging Post-Snapshot Trading:

We strongly discourage trading of Loco NFTs; the royalties generated will be directed back to the issuer wallet, and the NFTs no longer hold intrinsic value. Any trading activity after the snapshot will not be honored for reward calculations.

- Special Consideration for Burnt NFTs:

If you chose to burn your Loco NFTs following previous adverse events (“the rug”), we will add you to the eligible list to ensure you are not further penalized.

This policy is designed to protect our community and ensure that only those who held the NFTs at the snapshot date benefit from future rewards.

6.2. Community Integration and Onboarding

- RIPWALK Token Airdrop:

As a gesture of goodwill, Gen1 and Gen2 Loco Lizards and Lionz holders will receive an airdrop of RIPWALK tokens during the last community distribution. The RIPWALK token already has multiple use cases including yield farming and integration with gaming initiatives, and it may feature in future LocoEvo enhancements (more on this as we become established).

- Exclusive Benefits:

All holders of Lionz and Lizards will receive a special role in the NFTE Discord server, granting access to any community free rolls and exclusive events for the NFTE community.

Our Loco Promise is designed to restore trust and welcome the community back into the NFTE ecosystem.

Whilst we are unable to backpay funds owed to the players who had a balance on Loco Poker before the project was compromised, we have this data available and stored as a snapshot. During the LocoEvo introductory period of six months, we will hold monthly spins for these players to be rewarded with various prizes from tokens to NFTs. We hope this goes some way towards encouraging trust in NFTE and the new LocoEvo platform. We will also explore ways to fully migrate all Lionz and Lizards holders to the NFTE community; with the aim of being able to close out any reference to the former loco collections after the first six months of gameplay.

7. NFTE Holder Privileges

All existing NFT Evolutionz holders will enjoy:

- **Special Discord Roles:**

Enabling access to free rolls, exclusive events, and early insights into upcoming features.

- **Ongoing Engagement:**

We will continue to support holders with dedicated rewards and access to new platform developments under the NFTE banner.

8. Affiliate Program Overview

In our commitment to expanding the LocoEvo Poker ecosystem and fostering robust community growth, we are excited to introduce an Affiliate Program tailored for both external projects and individual promoters who wish to help onboard new members. This initiative is designed to provide transparent, accessible, and rewarding opportunities for affiliates while maintaining our existing user base integrity.

8.1 Key Features

- **Affiliate Registration:**

Once registration is complete, requests for a project or individual affiliate code can be raised with the NFTE founding team via discord; allowing us to accurately track new onboarding efforts and reward performance based on new acquisitions.

- **Agent Dashboard:**

Affiliates will receive access to a dedicated dashboard where they can:

- **Monitor Onboarded Players:** Track each new player referred to the platform.
- **View Earnings:** Real-time reporting on commissions earned from player activity.
- **Weekly Withdrawals:** Withdraw affiliate earnings on a weekly basis for consistent cash flow.

8.2 Benefits for Affiliates

- **Transparent Earnings:**

With clear tracking and weekly withdrawal options, affiliates can confidently measure and receive compensation for their onboarding efforts.

- **Expanded Reach:**

By collaborating with diverse projects and influencers, affiliates can help broaden the LocoEvo Poker community and drive substantial growth within the NFTE ecosystem.

- **Affiliate Tournaments**

Affiliates can run Tournaments specifically for players who register with LocoEvo via their specific Affiliate link. These can be arranged by contacting the founding team.

8.3 Getting Started

Prospective affiliates and project partners are encouraged to contact our team directly to learn more about enrolment in the Affiliate Program. Once onboarded, affiliates will be provided with comprehensive guidelines, access to the agent dashboard, and all necessary support to maximize their success.

This Affiliate Program reflects our vision of creating a collaborative and inclusive ecosystem that rewards community-driven growth, setting the stage for LocoEvo Poker to become a dominant force in the crypto poker space.

9. Tournament Hosting for External Projects:

In addition to the affiliate program, we will extend our capabilities to host tournaments for other projects operating on any blockchain supported by LocoEvo Poker. These hosted tournaments will incur a small percentage fee to cover setup and hosting expenses, providing an additional revenue stream for our platform while promoting inter-project collaboration.

- **Additional Incentives:**

Hosting tournaments for external projects not only creates more engagement but also opens up opportunities for additional collaborations.

10. Conclusion

LocoEvo Poker is poised to redefine the crypto poker experience through robust security, multi-chain functionality, and a community-centric roadmap. Our initial six-month introduction period is the first step in building a resilient and profitable gaming ecosystem under the NFT Evolutionz banner. We are committed to doing this right—avoiding guesswork and overpromising in favor of steady growth, transparency, and delivering tangible value to our community.

Together, we are shaping the future of crypto gaming. After the six-month period, we hope all legacy Loco NFT holders will have smoothly transitioned into the NFTE ecosystem, either via RIPWALK or other NFTE projects. Toward the end of this period, we will host floor-sweeping competitions with exciting prizes to encourage participation and ensure that every member of our community benefits from our collective growth.

For further updates, detailed metrics, and an expanded roadmap post-introduction period, please refer to our discord announcements and website where we will continue to build out and update our platform plans, as it continues to expand.
